06 Medical devices

- Infrared thermometer
- Finger pulse oximeter

Forehead Thermometer

Features

- Product name: Medical infrared thermometer
- Non-Contact design, safe and more hygienic to use.
- Easy-to-Use, no complicated instructions
- Quick measurement, get reading less than 1 second.
- Accurate and reliable
- Multi-functional, can measure forehead, room, milk, water and object temperature .
- 35sets of memories, easy to recall
- Fever alarm function, displayed in orange and red light
- Switching between ℃ and °F
- Switching between mute and un-mute, won't disturb sleeping baby or patient
- Auto shut -down and power-saving

Finger Pulse Oximeter

Features

Major Features

- SpO2 value display
- Pulse rate value display, bar graph display
- Pulse waveform display
- The display mode can be changed
- Screen brightness can be changed
- Display format can be saved after power off

Main performance

- Display Mode:Color display
- Screen Resolution:128*64
- SpO2 Measuring Range:0%~100%, (the resolution is 1%).
- Accuracy:70%~100%:±2% , Below 70% unspecified.
- PR Measuring Range:30bpm~250bpm, (the resolution is 1bpm)
- Accuracy:±2bpm or ±2% (select larger)
- Measurement Performance in Weak Filling Condition:SpO2 and pulse rate can be shown correctly when pulse-filling ratio is 0.4%. SpO2 error is ±4%, pulse rate error is ±2 bpm or ±2% (select larger).
- Resistance to surrounding light: The deviation between the value measured in the condition of man-made light or indoor natural light and that of darkroom is less than ±1%
- Power Consumption:less than 30mA
- Voltage: DC 2.6V - 3.6V
- Power Supply:1.5V (AAA size) alkaline batteries × 2
- Battery working hour: Two batteries can work continually for 20 hours, The theoretical number is 36 hours
- Safety Type:Interior Battery, BF Type

Accessories

- a hanging rope
- a user manual

Sharps Disposal Container Box :

Features

- These sharps disposal containers are designed for use in patient rooms, on med carts, or in high traffic areas.

Product Details

ISO13485:2018

Counter-balanced lid creates a torturous path to facilitate safe disposal

- Lid design facilitates one-handed operation
- Horizontal drop design for maximum capacity to fill line
- Easy-to-see fill levels

Slide Lid

- Non-torturous lid design accommodates a variety of sharps sizes
- Horizontal drop maximizes use of container volume
- Containers lock for final disposal and safe transport

Plastics Disposable Emesis Basin

Features

- It is used for hospital nursing; it can be used to carry puke for patient on the hospital bed.
- Mainly used to clean wounds and change dressings
- Reducing time for collecting components during operation
- Eliminate labor for intensive work.
- We do as customer's requirement for the detail content and packing method, including the detail combinations, packing method.
- With sterilization, the effect can be assured very well for long time.

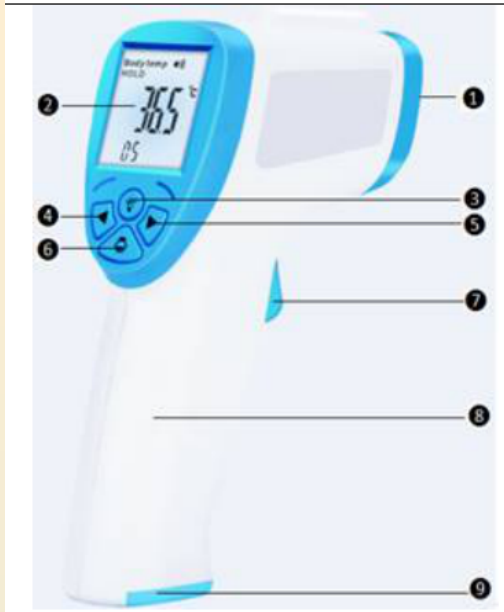
Chapter III Product Specifications And Unit Price

Product parameters:

Delicate,convinent and efficient		
Product name	Medical infrared thermometer	
Product model	E1501 / R6	
Screen specification	4 * 14 (TN full transparent positive display, 28.5mm * 34.3mm * 2.8mm)	
Probe type	tts-m5	
Product type	Human body temperature measuring instrument	
Product weight	100g (without battery)	
Measuring distance	3CM-5CM	
Measurement accuracy	±0.2°C(0.5°F)	
Automatic breakage	About 20s	
Measuring time	0.5s	
Supply voltage	Dc3v (2 No.7 alkaline batteries / in series)	
Frequency of use	Press more than 100000 times	
Show exact digits	0.1°C(0.1°F)	
Storage temperature	-20-55 degrees C	
Operating ambient temperature	5 ° C ~ 40 ° C, the best temperature is 25 °	
Relative humidity	< 85%	
Temperature measurement range in human body	32.0-42.99C	
High measurement accuracy (using plug-in only ADC algorithm processing)	32~35.9°C(93.2~96.6°F)	±0.3°C(0.5°F)
	36~39°C (96.8~102.2°F)	±0.2°C(0.4°F)
	39~43°C(102.2~109.4°F)4	±0.3°C(0.5°F)

Chapter III Product Specifications

Product structure:



Delicate, efficient and convenient	
1.	Infrared sensor
2.	Liquid crystal (LCD) display
3.	Backlight on / off button
4.	Up button (view historical data)
5.	Down button (view historical data)
6.	Sound switch button
7.	Measuring switch
8.	Handle
9.	Battery cover

Reference temperature:

Measuring location	Normal temperature (° C)	Normal Fahrenheit (° f)
Anus	36.6~38	97.8~100.4
oral cavity	35.5~37.5	95.9~99.5
Armpit	34.7~37.3	94.4~99.1
Ear	35.8~38	96.4~100.4
forehead	36~37.2	97.4~98.4

Chapter IV Product Certificate And Payment Terms

1. Product Certificate: CE Certificate, FCC Certificate

2.Payment Terms:

(1) Available Stock order: 100% payment in advanced and 2nd working day delivery

(2) Big order: 50% Deposit and balance T/T before the shipment, the delivery time： 10 working days.

One-click temperature measurement

The temperature can be quickly displayed with a simple press

Measuring Range	32℃-42.9℃
Measuring distance	3-5cm
Measurement accuracy	Within(35-42)℃+-0.2℃
Measurment display resolution	0.1℃
Memory	32 reading
Power Supply	2*AAA batteries(DC 3V)
Size	14.9*9.5*4.3cm
Product Weight	106g+-3g
Auto power-off	<20 seconds
Operating environment:	16℃-35℃;15%-80%RH
Packing information	1pc/carton,60pcs/ctn,size:57*36*36cm, Weight:9.98kg

THERMAL IMAGER

- 2.8" TFT screen
- Infrared resolution: 256 x 192
- Frame rate: 25Hz
- Temperature measurement range: 30℃~45℃
- Accuracy: ±0.5℃
- Photograph function with SD card storage
- PC software analysis
- Real-time image transmission
- Visual camera (640×480)
- Type-C USB interface
- 1/4" tripod mounting hole

Real-time image transmission

Set the USB mode to USB camera, connect the USB cable to the computer to mirror the computer software by real-time image transmission.

ULTRAVIOLET RAYS
DISINFECTION BOX

Description:
- Sanitization: Kill up to 99.9% germs for your non-washable personal items in 3minutes
- Wireless Charging: Simply put your smartphone on the UV-Box top , you can enjoy up to 7.5W (iOS) and 10W (Android) wireless charging

Specification:
- Input: 5V 3A
- USB / Type C Output: pass through
- Rated Power: 9W
- UV Output: 2W (max)
- UV Wavelength: 253.7nm
- Disinfection Time: 3min
- Material: ABS+PMMA
- Size: 232 x 127 x 50mm

Charging Interface
USB Port Compatible with All Type Phones

INJECTION WORKSHOP

• Injection Department

There are 17 injection molding machines and 14 robots in injection department.
Precision injection molding machines have a tonnage of 80 to 780 tons.
Can meet the various needs of customers.

7 injection molding machines from **80** tons to **258** tons
4 injection molding machines from **350** tons to **450** tons
3 injection molding machines from **500** tons to **530** tons
3 injection molding machines from **650** tons to **780** tons

FILTER PLANT

6 automated standard productionlines

HIGH EFFICIENCY & LOW RESISTANCE ANTI-PARTICULAR RESPIRATOR MASK

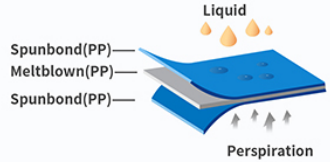
Model: FFP2 MASK

Packing Bag：175*140mm
Packing Box：178*142*132mm, 25pcs/box
Packing Carton：675*580*390mm, 40boxes/carton
Gross Weight： 8kg/carton

Specifications

Product Name : FFP2 Mask
Main Component: Non-Woven + Melt-Blown
Valid Period: 3years
Industry Standard: EN149:2001+A1:2009

SMS Material



Advantages

- Large Space, Good Air Permeability
- Anti-Bacterial Rate Over 95%
- More Agile Folding Design Style

MASK OF FISH TYPE

Model: KN9502-FFP2

Packing Bag：240*100mm, 5pcs/bag
Packing Box：100*100*248mm, 25pcs/box
Packing Carton：545*445*540mm, 40 boxes/CTN
Gross Weight：7.15kgs

Rapid screening for vehicles
and passengers

Powerful Helmet for Verification

Rapid face recognition and identity verification

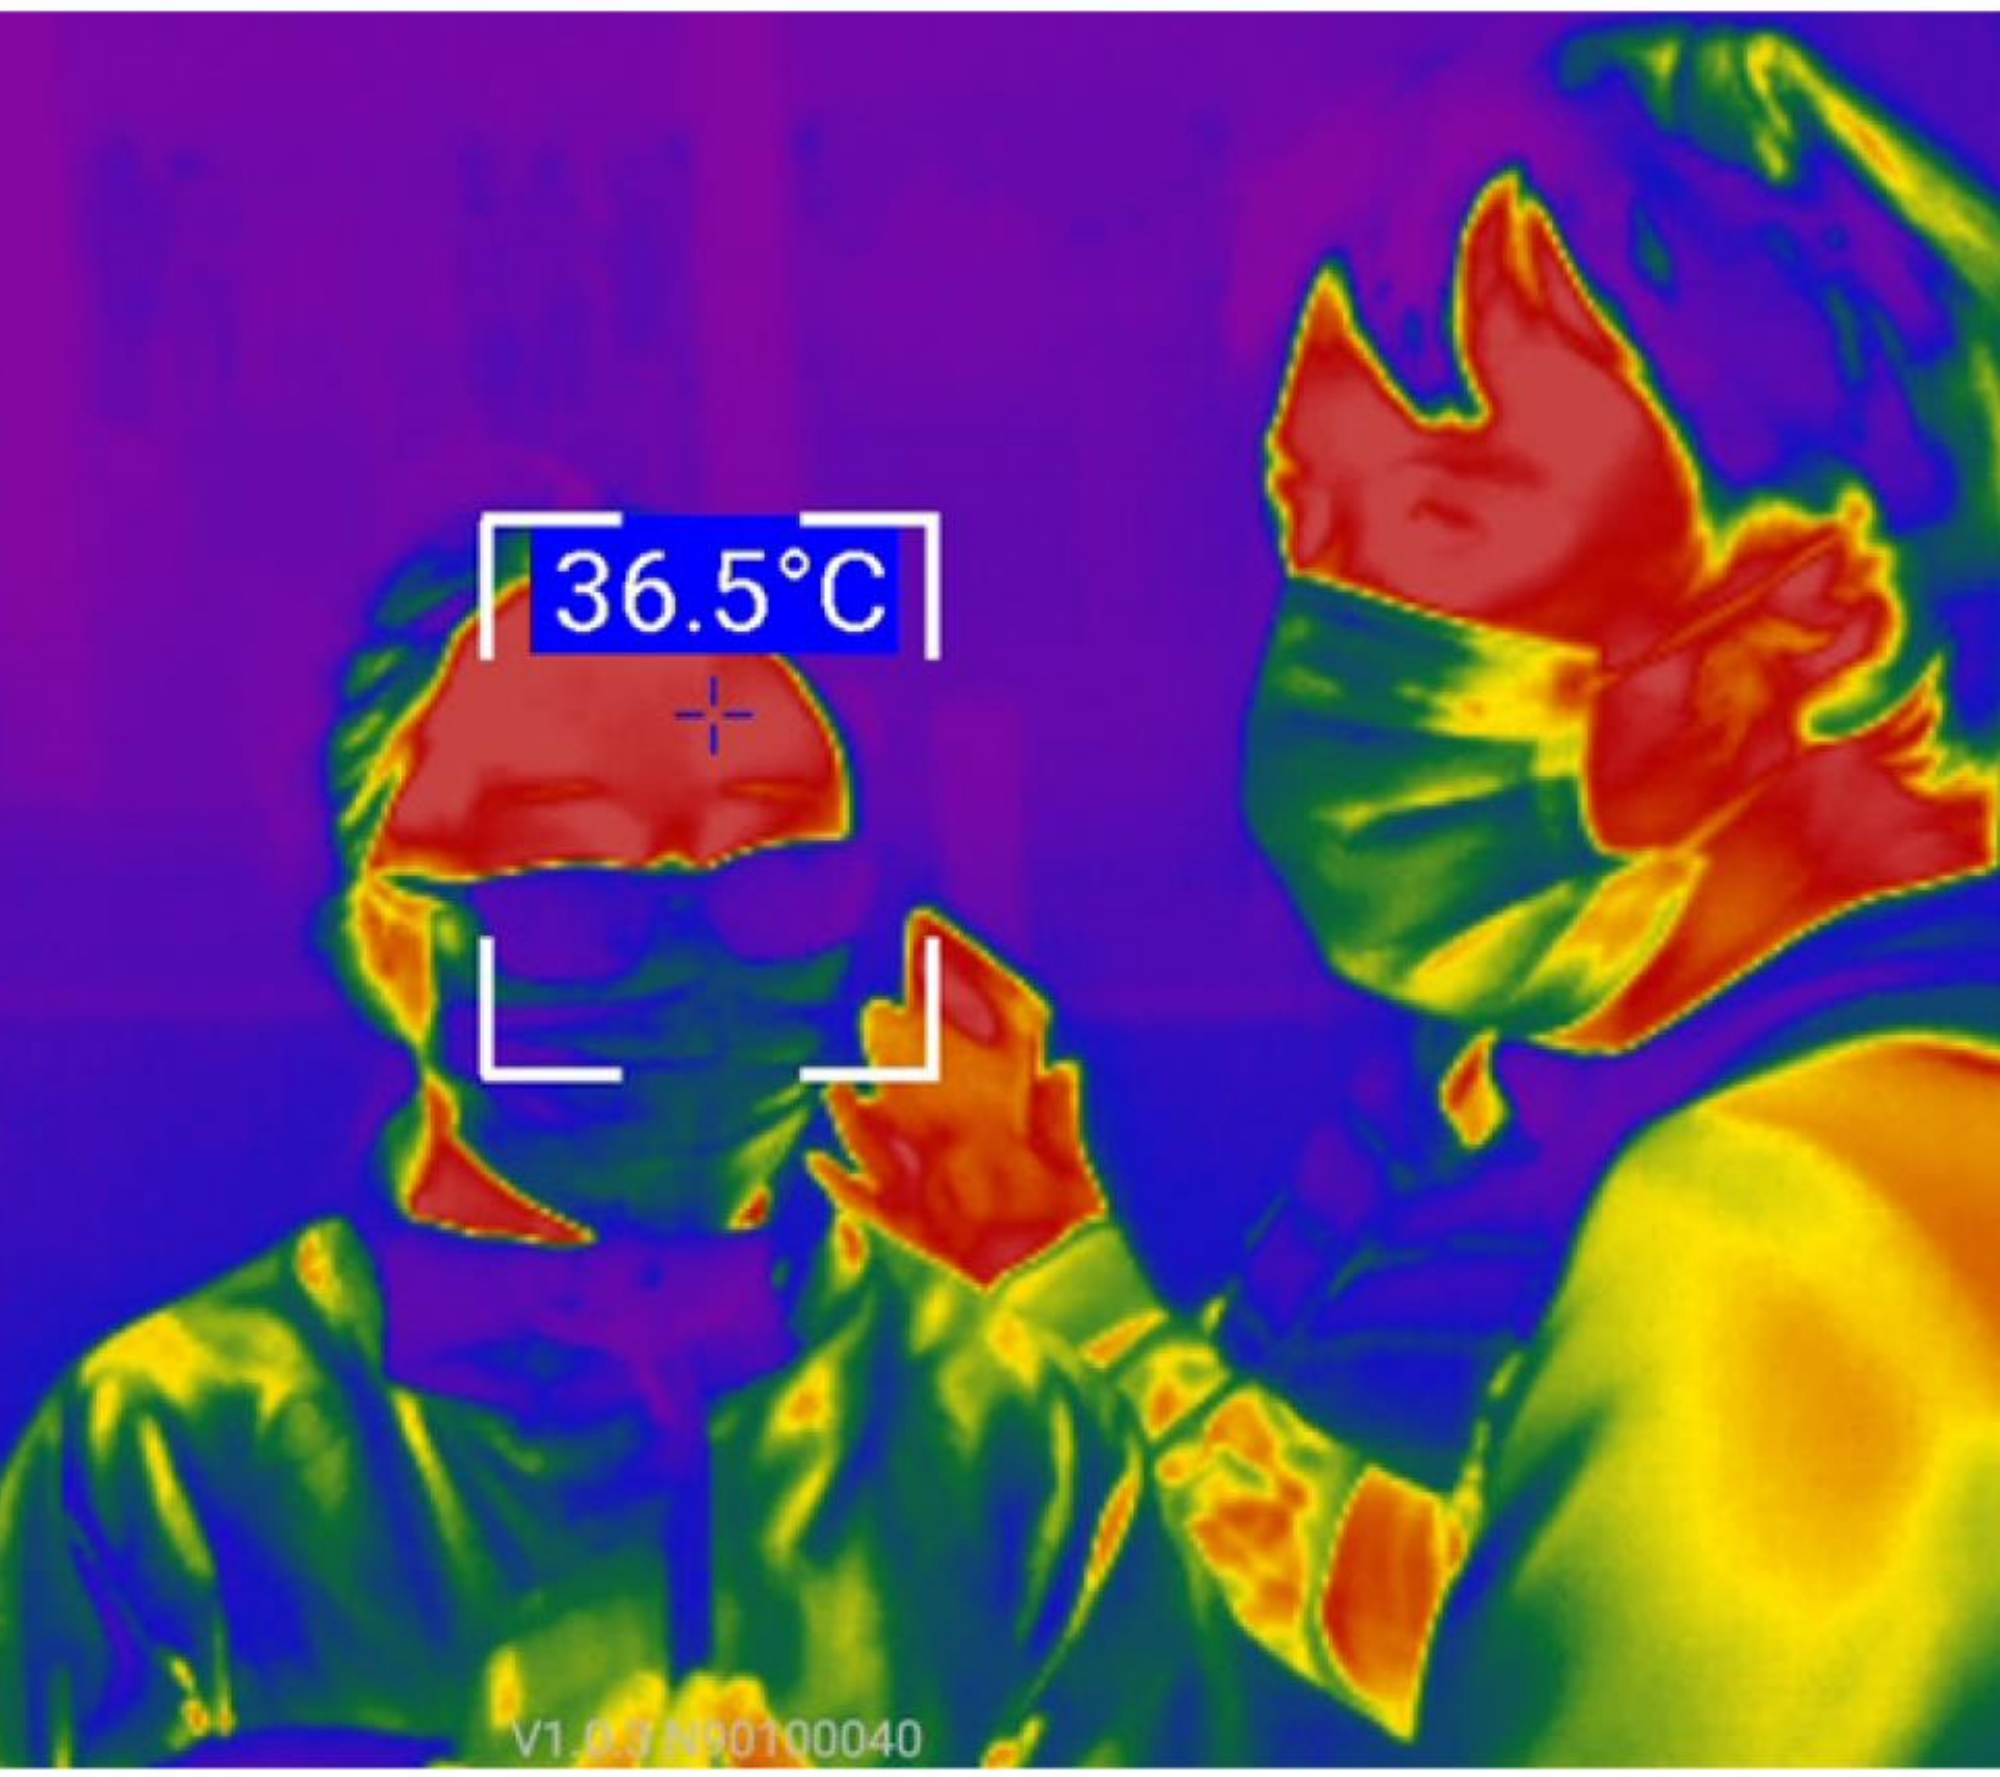
Smart Helmet with Thermal Imaging

Make the invisible visible

Nine Modes

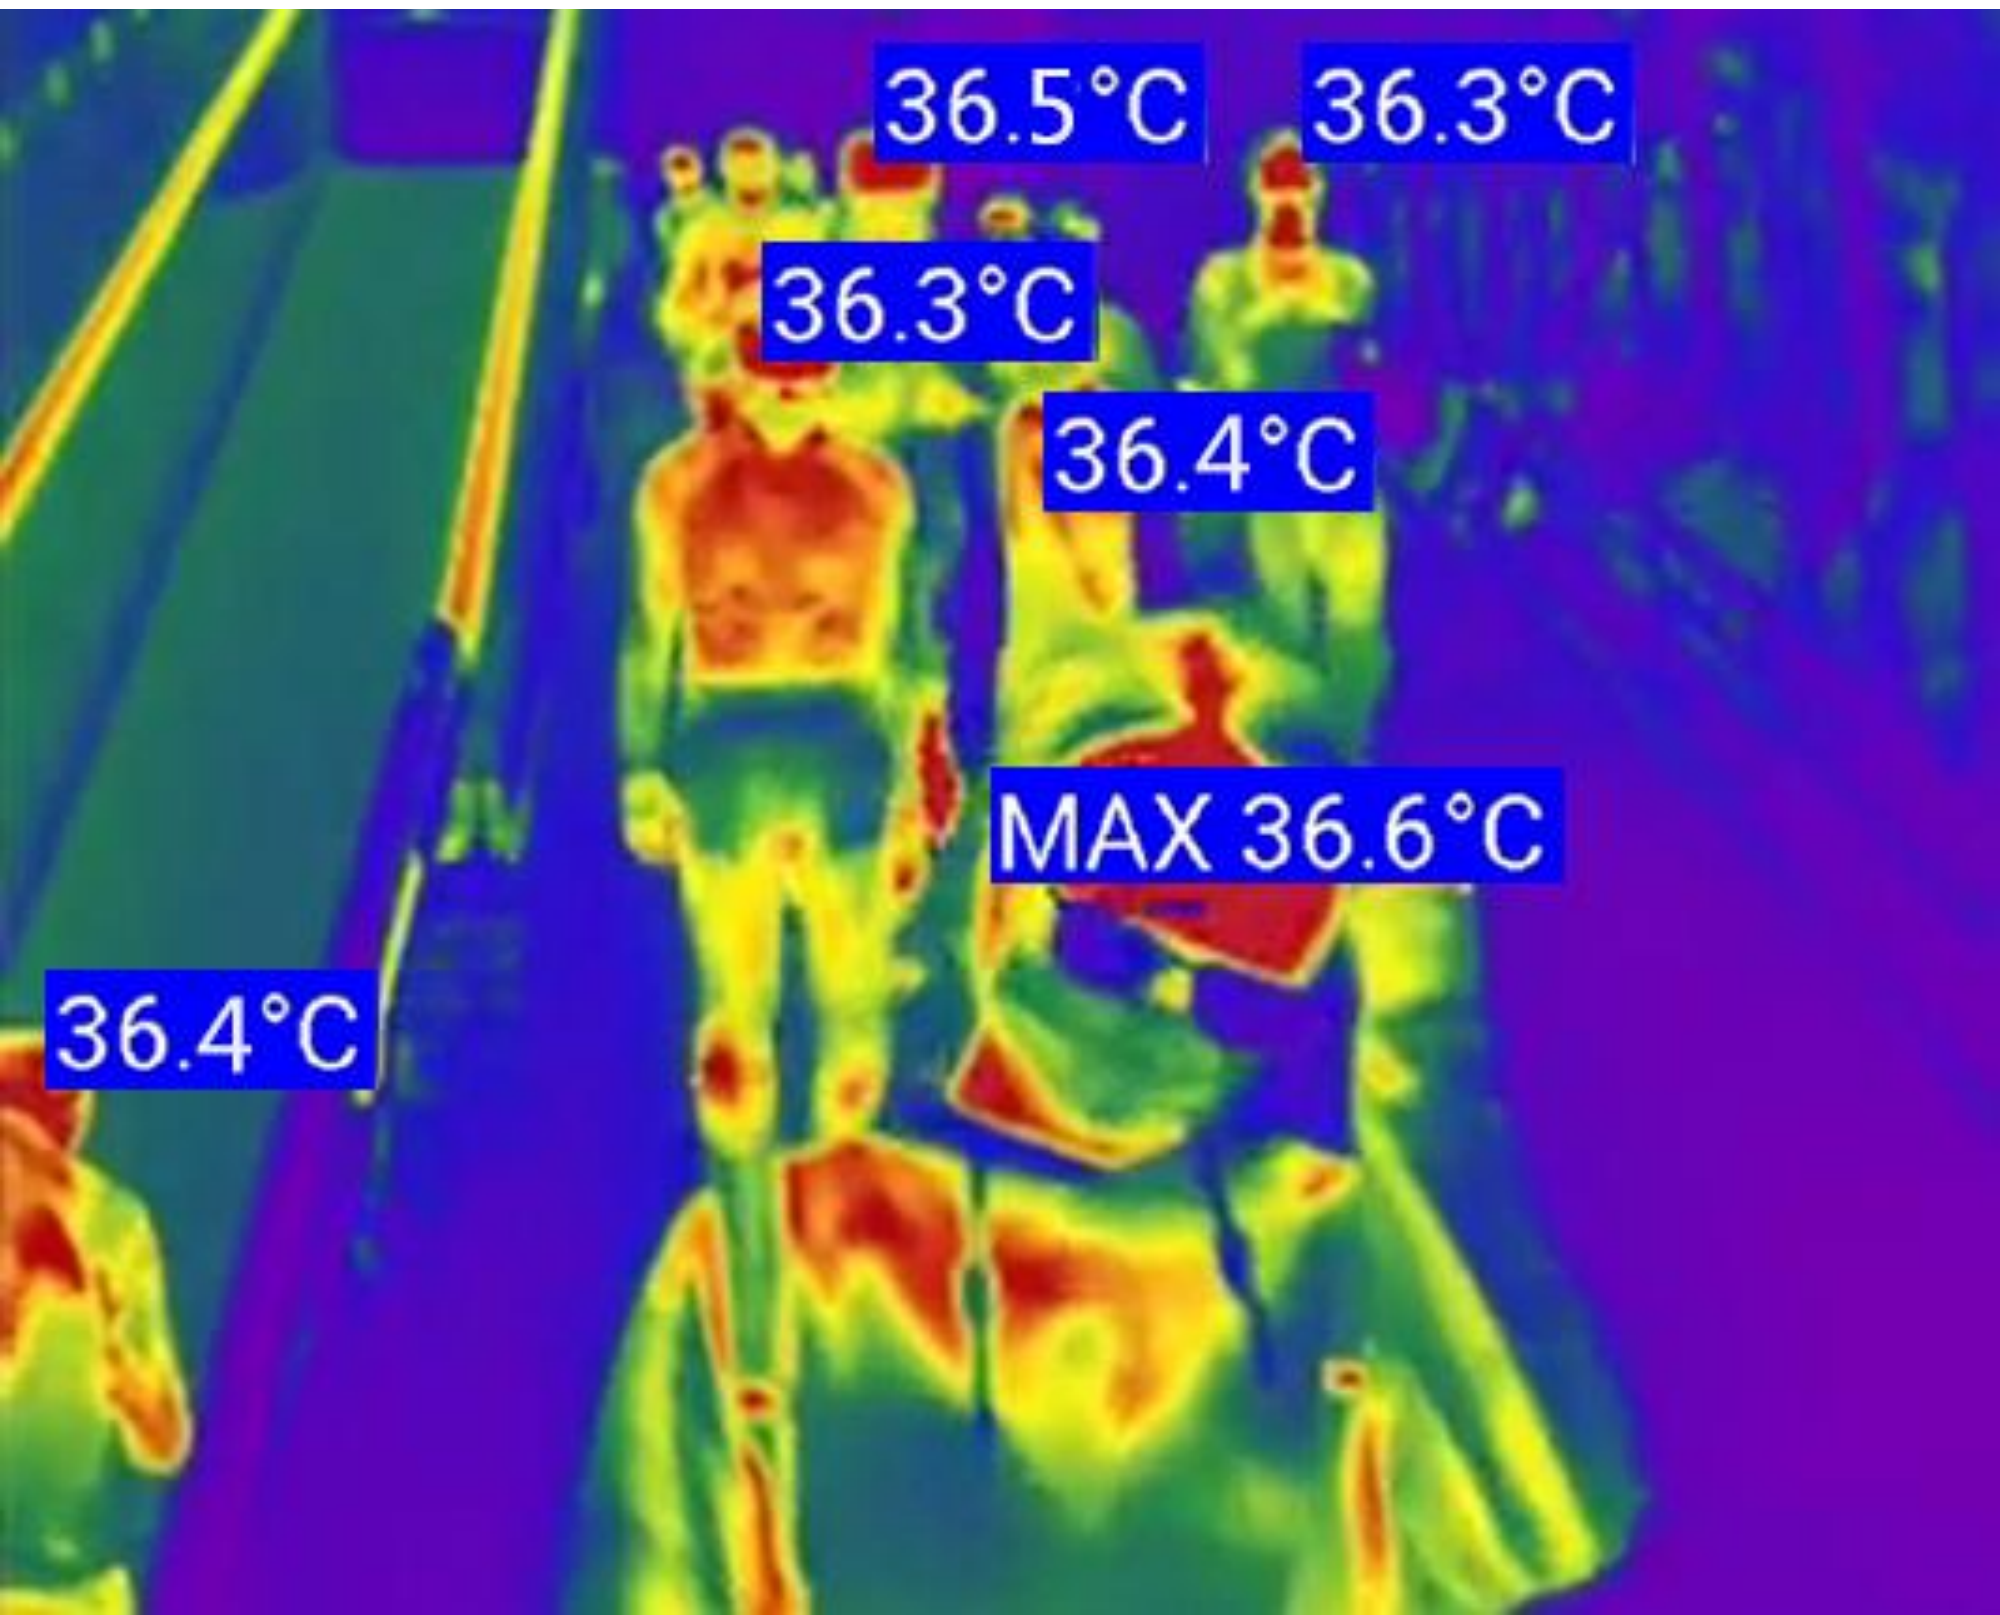
Single-person temperature measurement mode

The temperature of the single target in the center of the screen will be measured. The maximum temperature of different parts of the body is displayed on the AR module. The temperature above the normal range will trigger a audible and visual alarm.



Large-crowd temperature measurement mode

The temperature of the forehead, collar, arm, and other body parts exposed in the screen will be measured. The system will display the temperature if any part in the screen falls into the preset temperature range. The alarm will trigger when any part of the temperature goes above the threshold value.



QR code mode

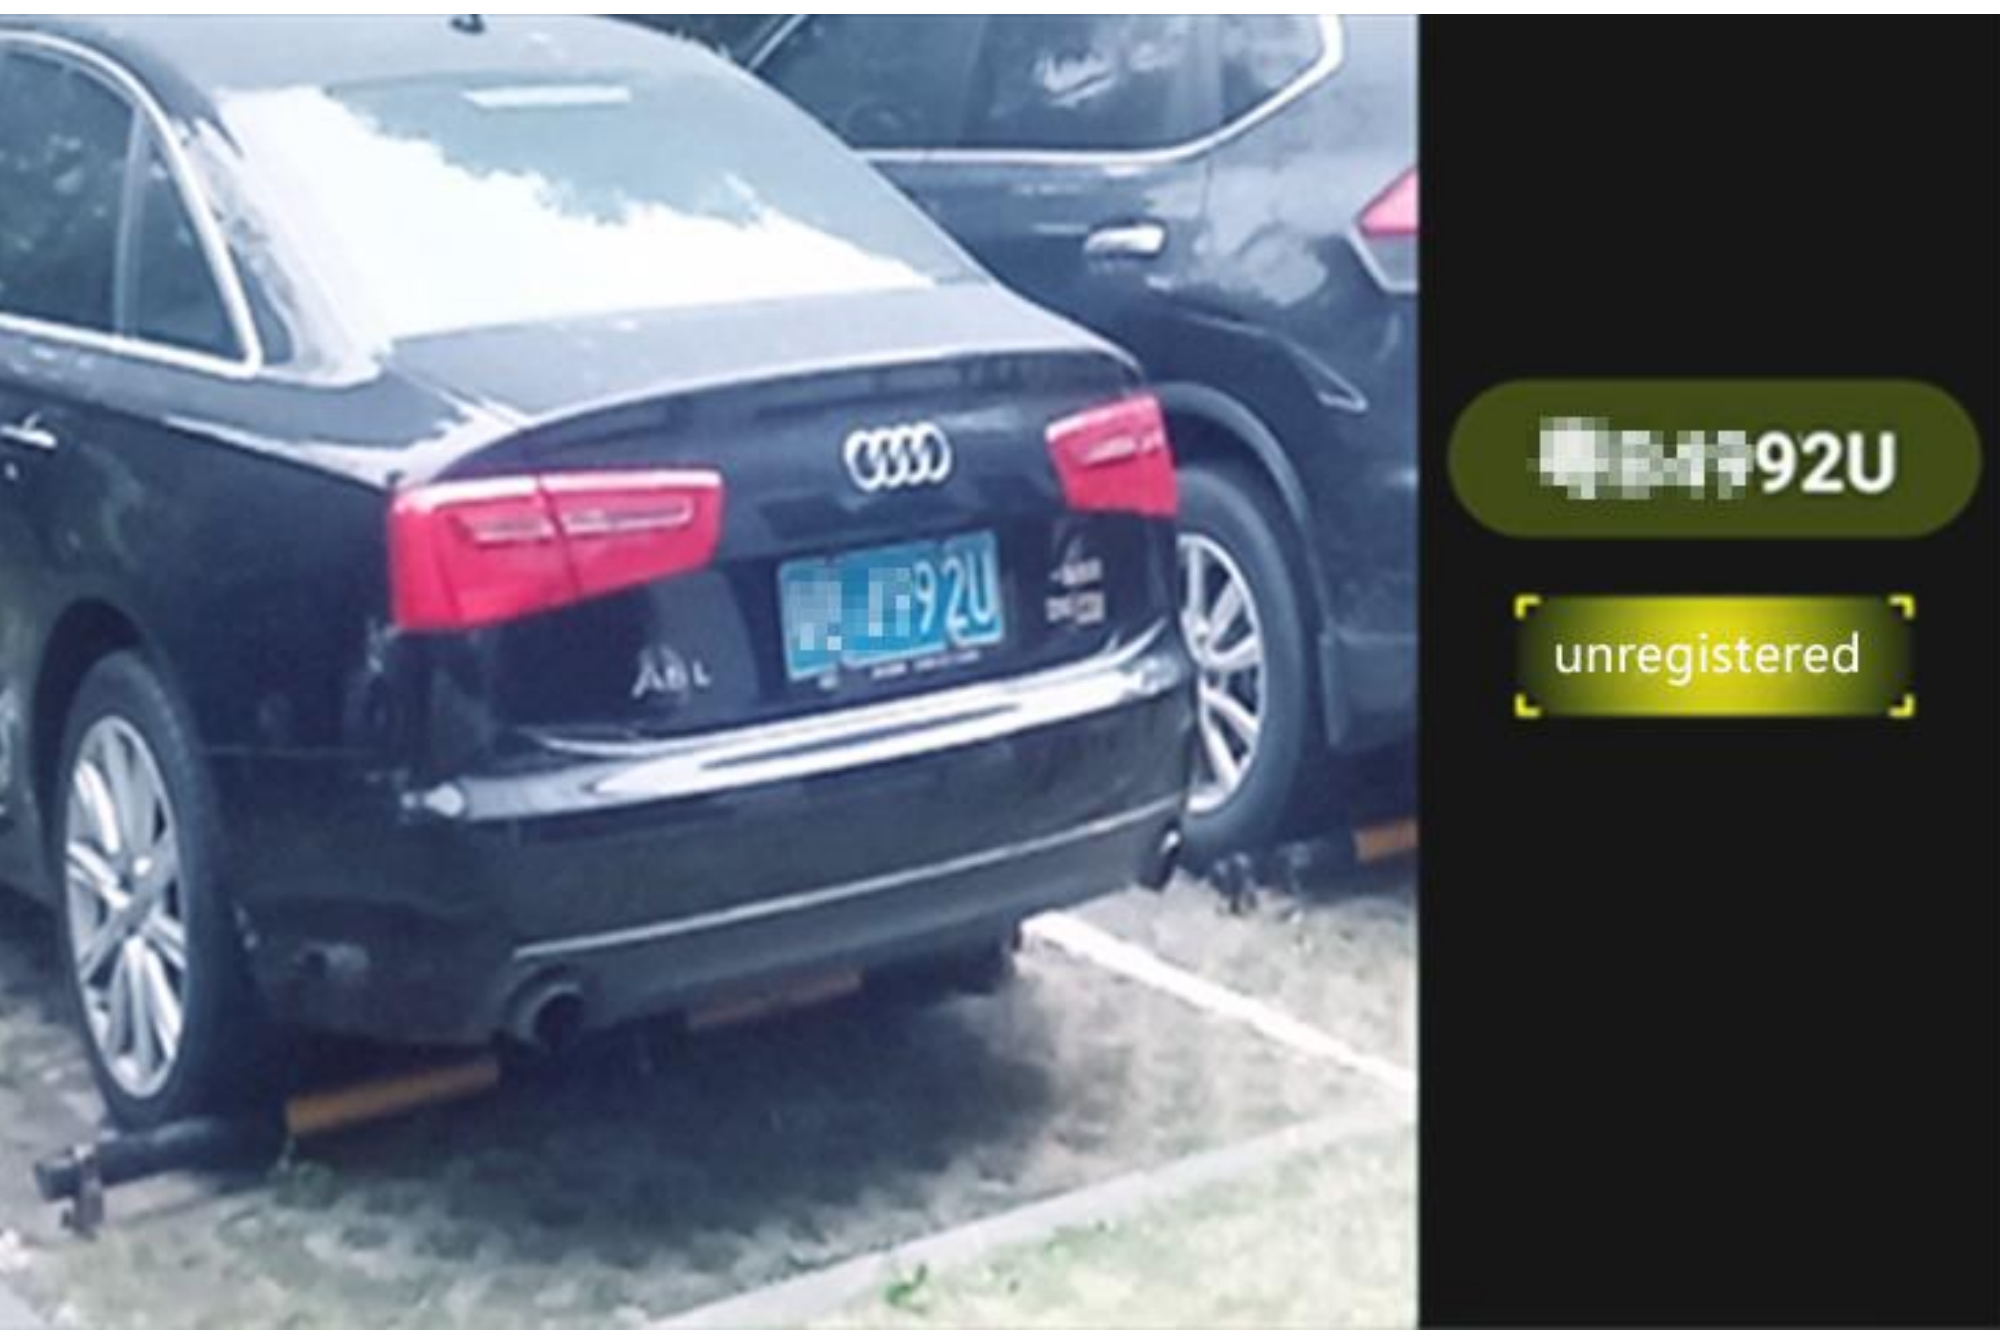
Scan the QR code to automatically record personal temperature info into the database in real time, allowing paperless data logging.

QR code & temperature measurement mode

Scan the QR code to acquire the personal information first, and take a temperature measurement of the person within 3s. The personnel information and the corresponding temperature will be automatically recorded into database. This will implement paperless registration of the personnel information and the corresponding temperature.

License plate recognition mode[1]

Recognize the vehicle license plate , identify and alert unregistered vehicles or suspect vehicles recorded in database.



[1]License plate recognition is temporarily only available in mainland China, and could be customized for other countries when needed.

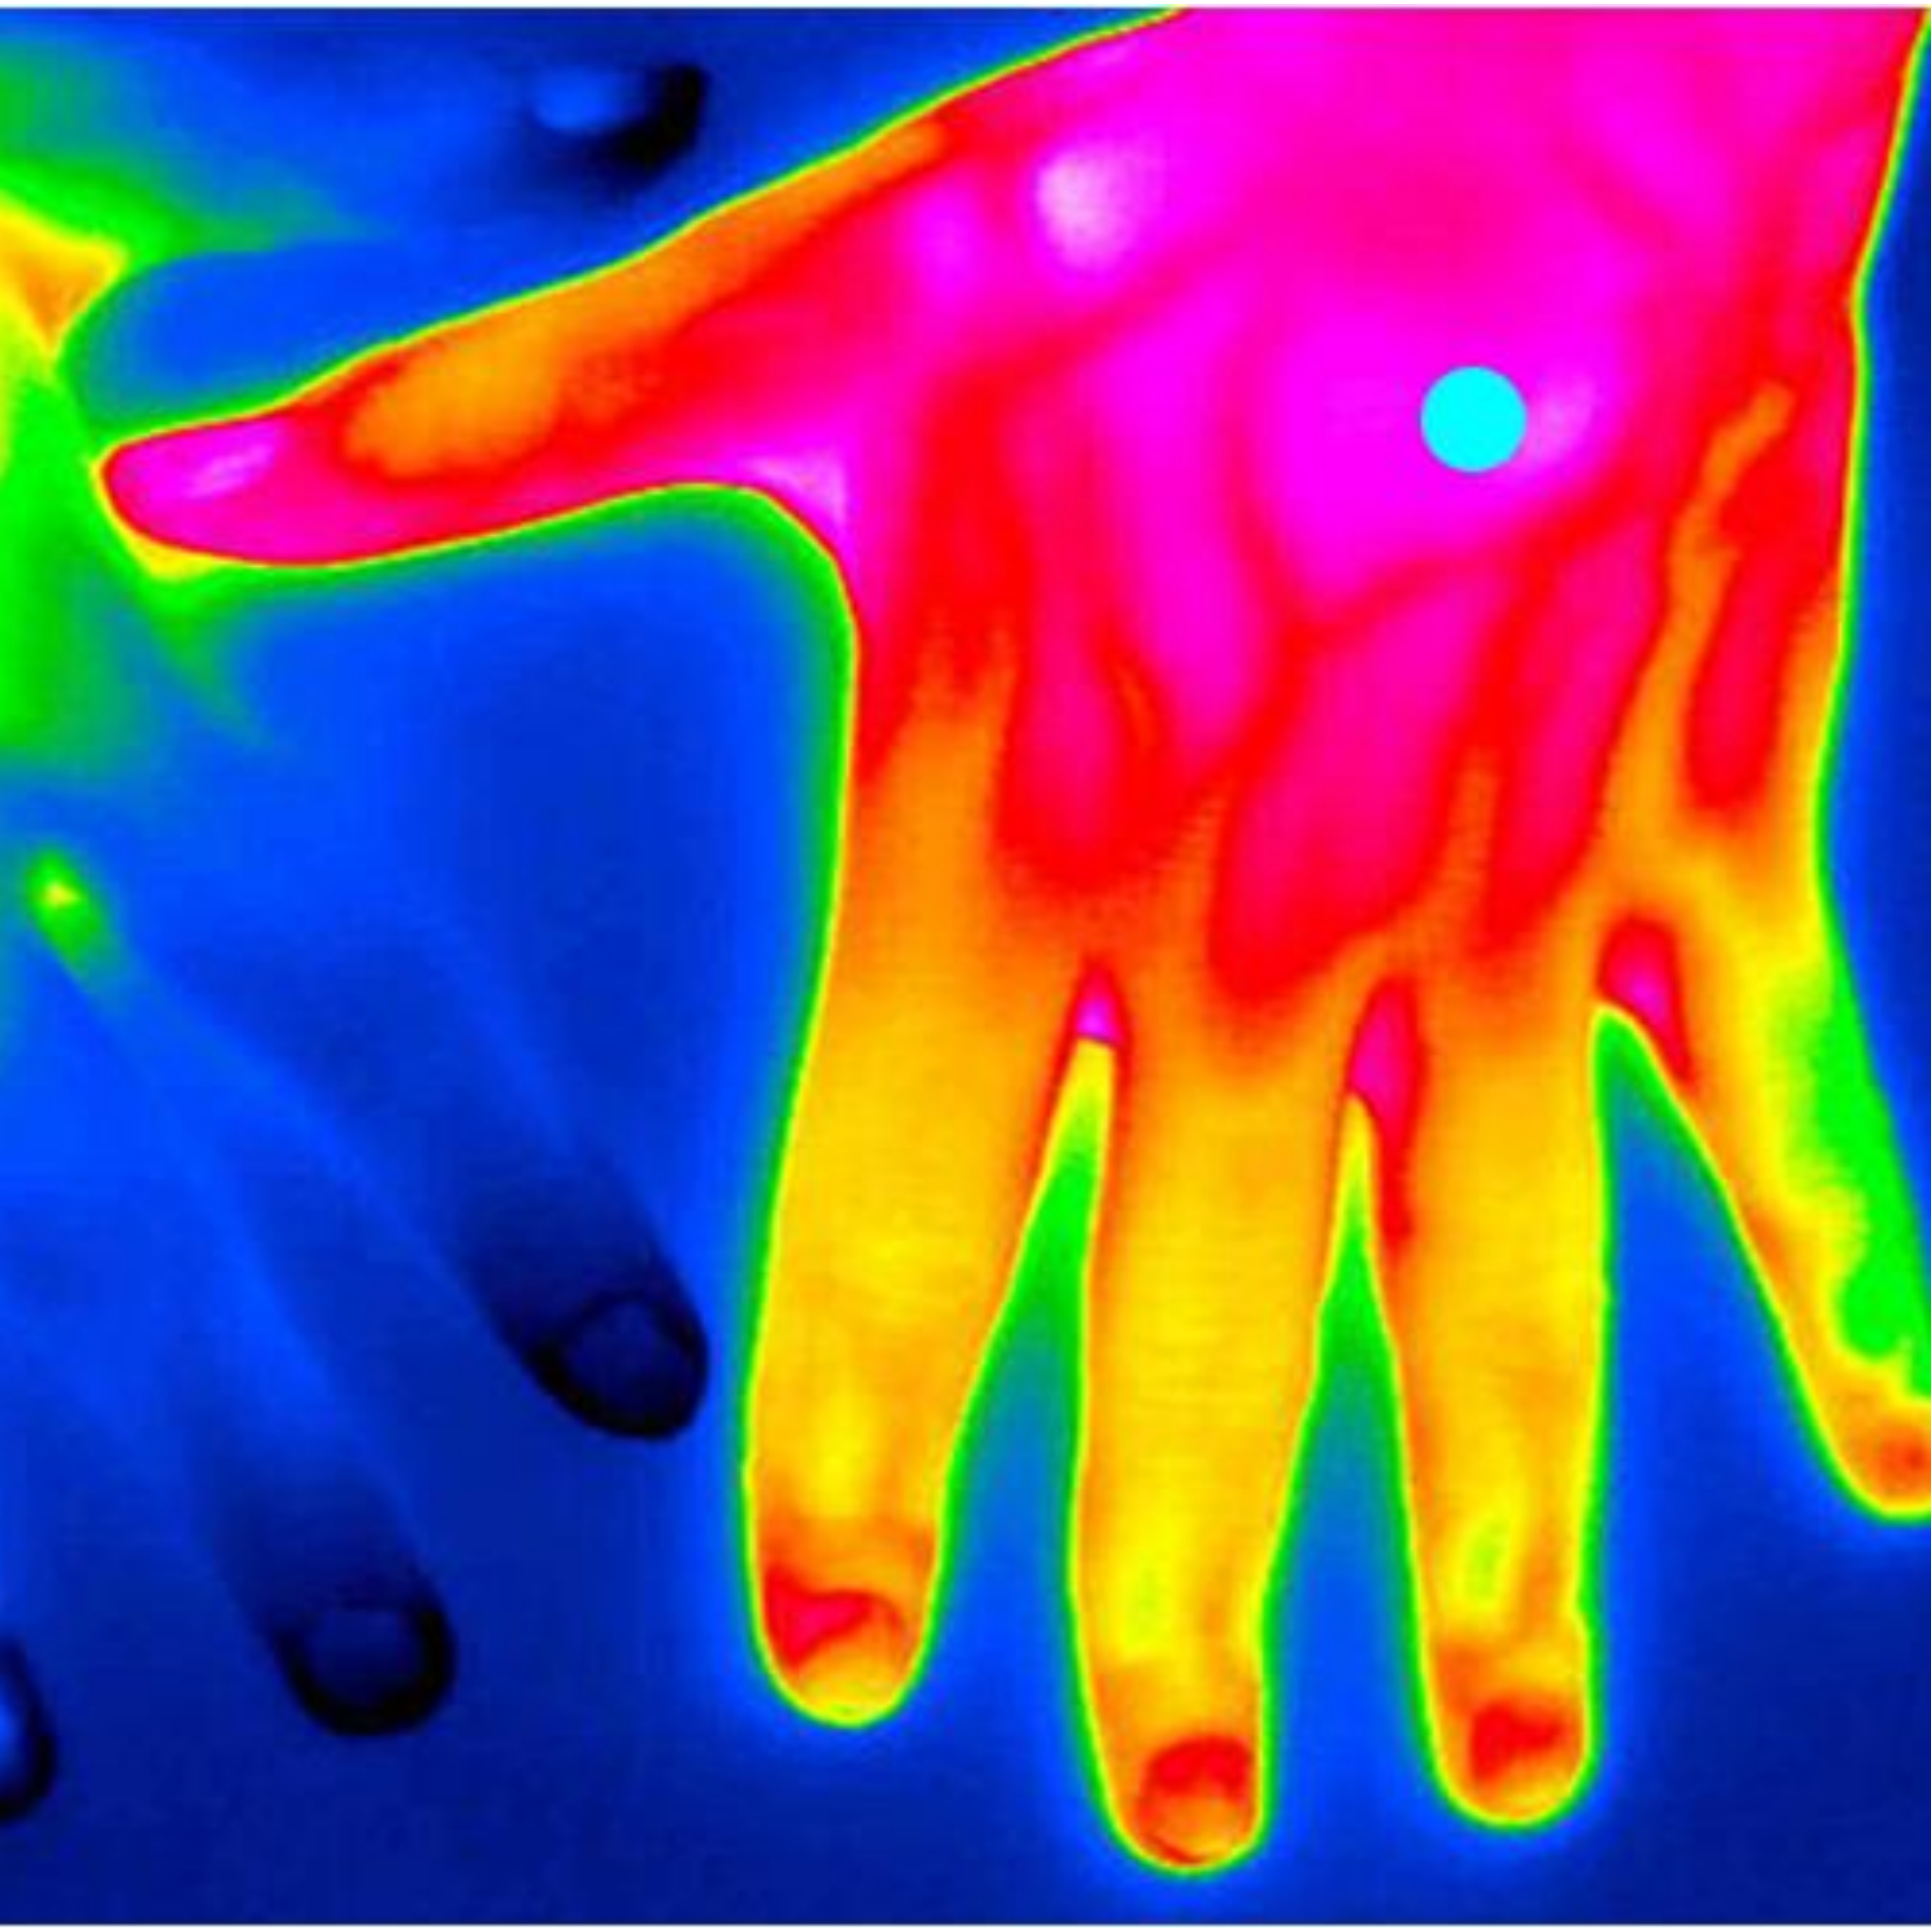
License plate recognition & temperature measurement mode [1]

Besides plate identification mentioned before, the helmet can measure the temperature of the single target in the center of the screen. The maximum temperature of different parts of the body is displayed on the AR module, and the temperature above the normal range will trigger a audible and visual alarm.

[1]License plate recognition is temporarily only available in mainland China, and could be customized for other countries when needed.

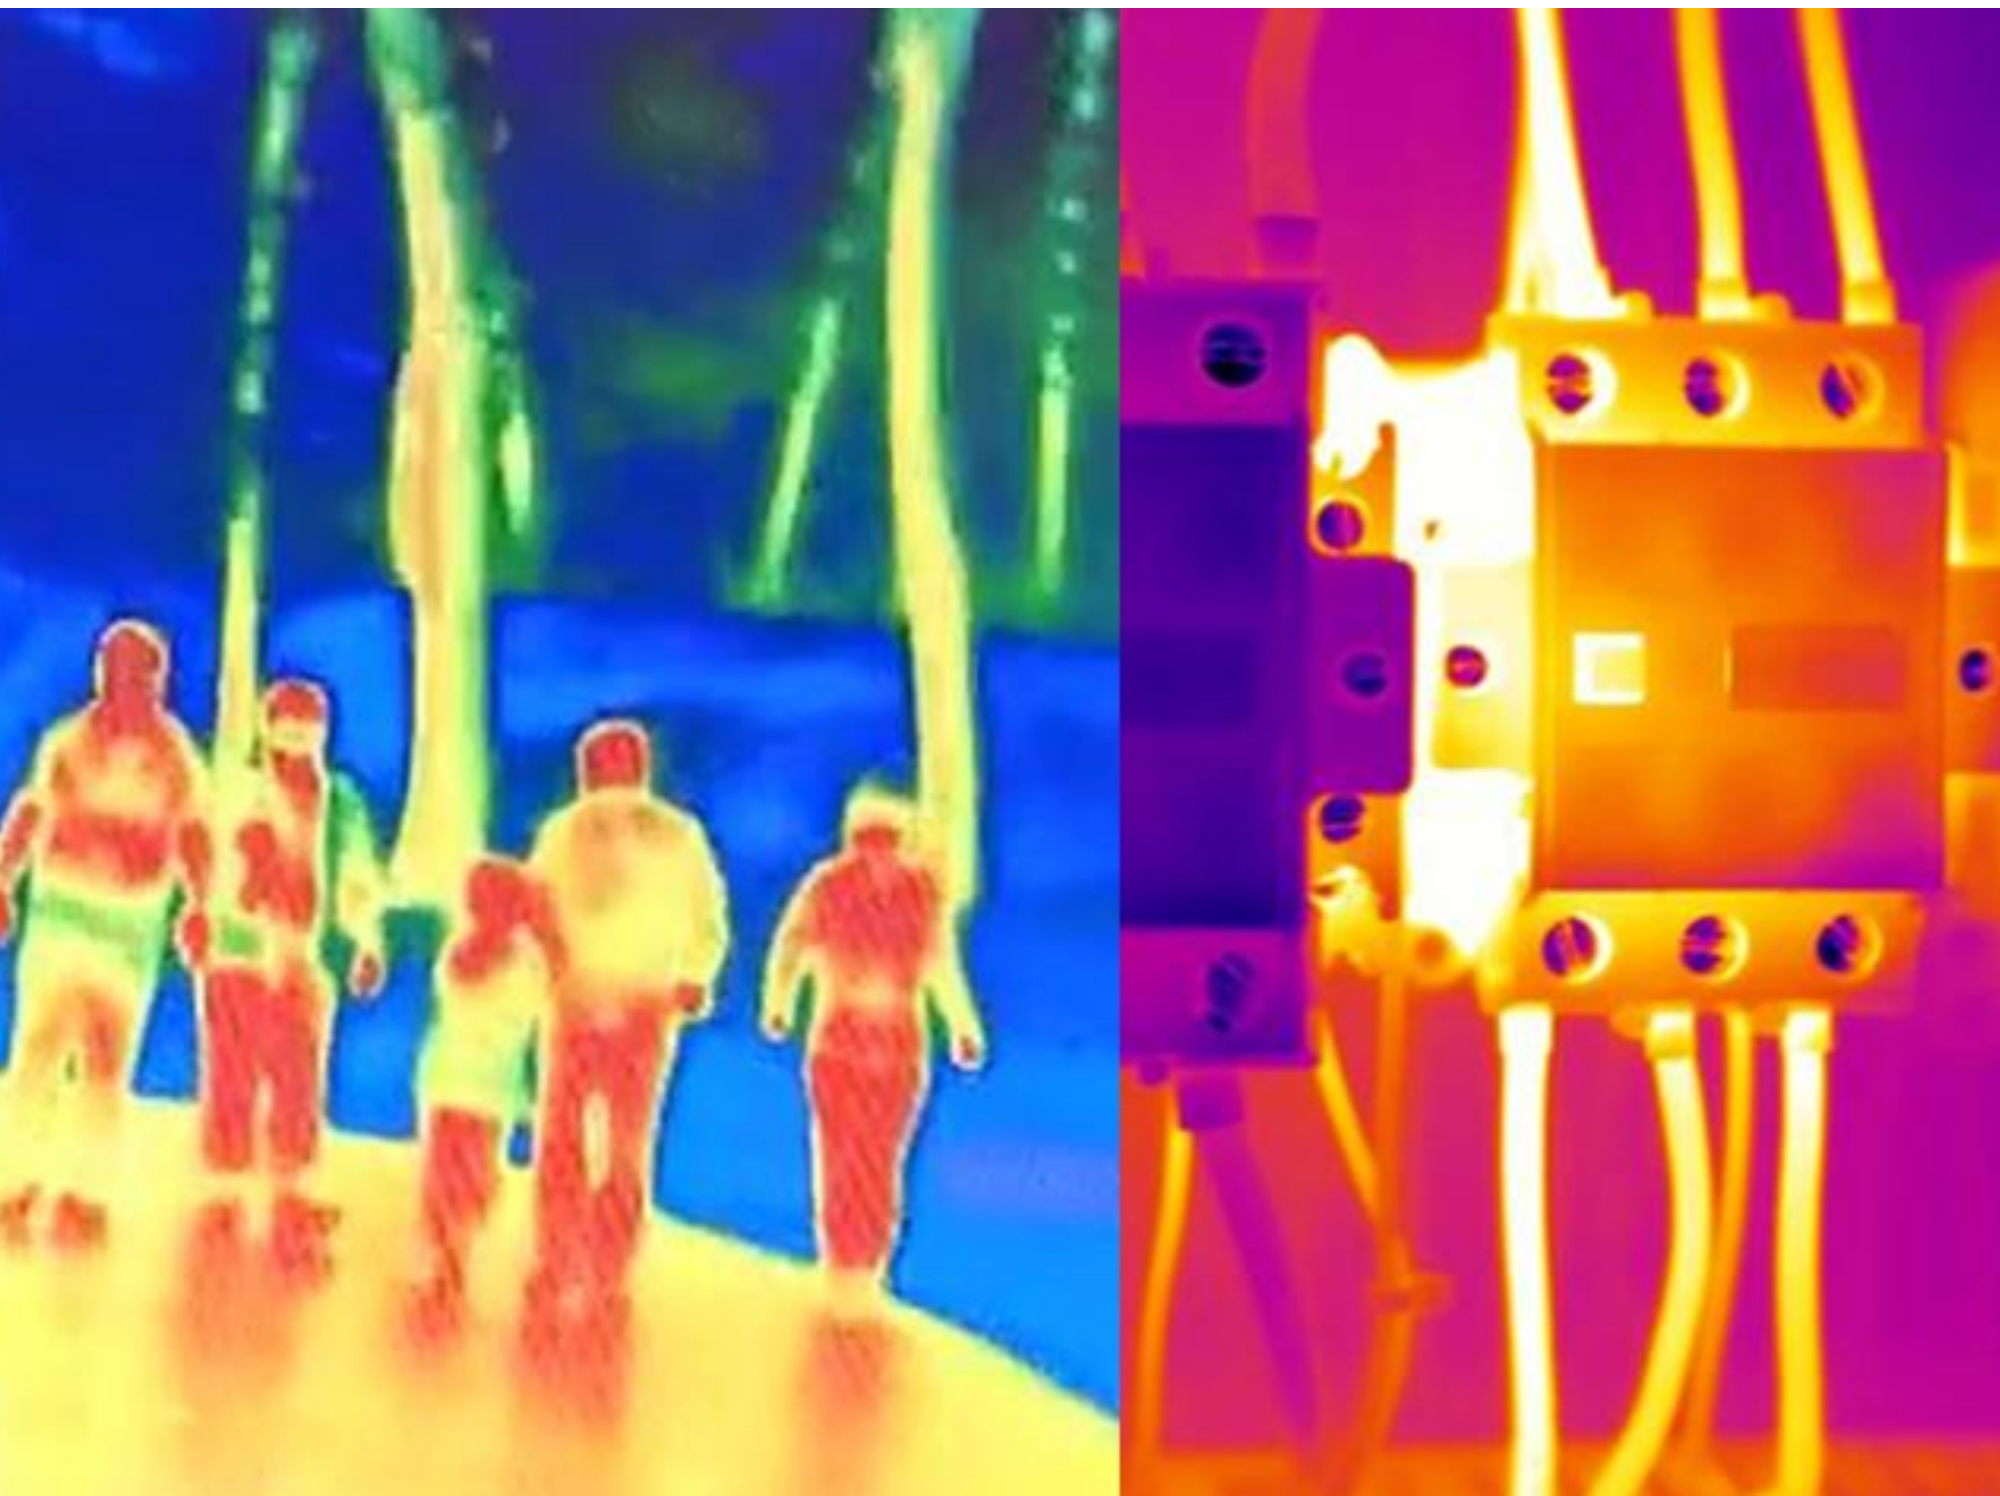
Thermographic diagnostic Imaging mode

Thermal imaging detection on specific parts of the human body to assist finding the location and size of the lesion areas that cause fever.



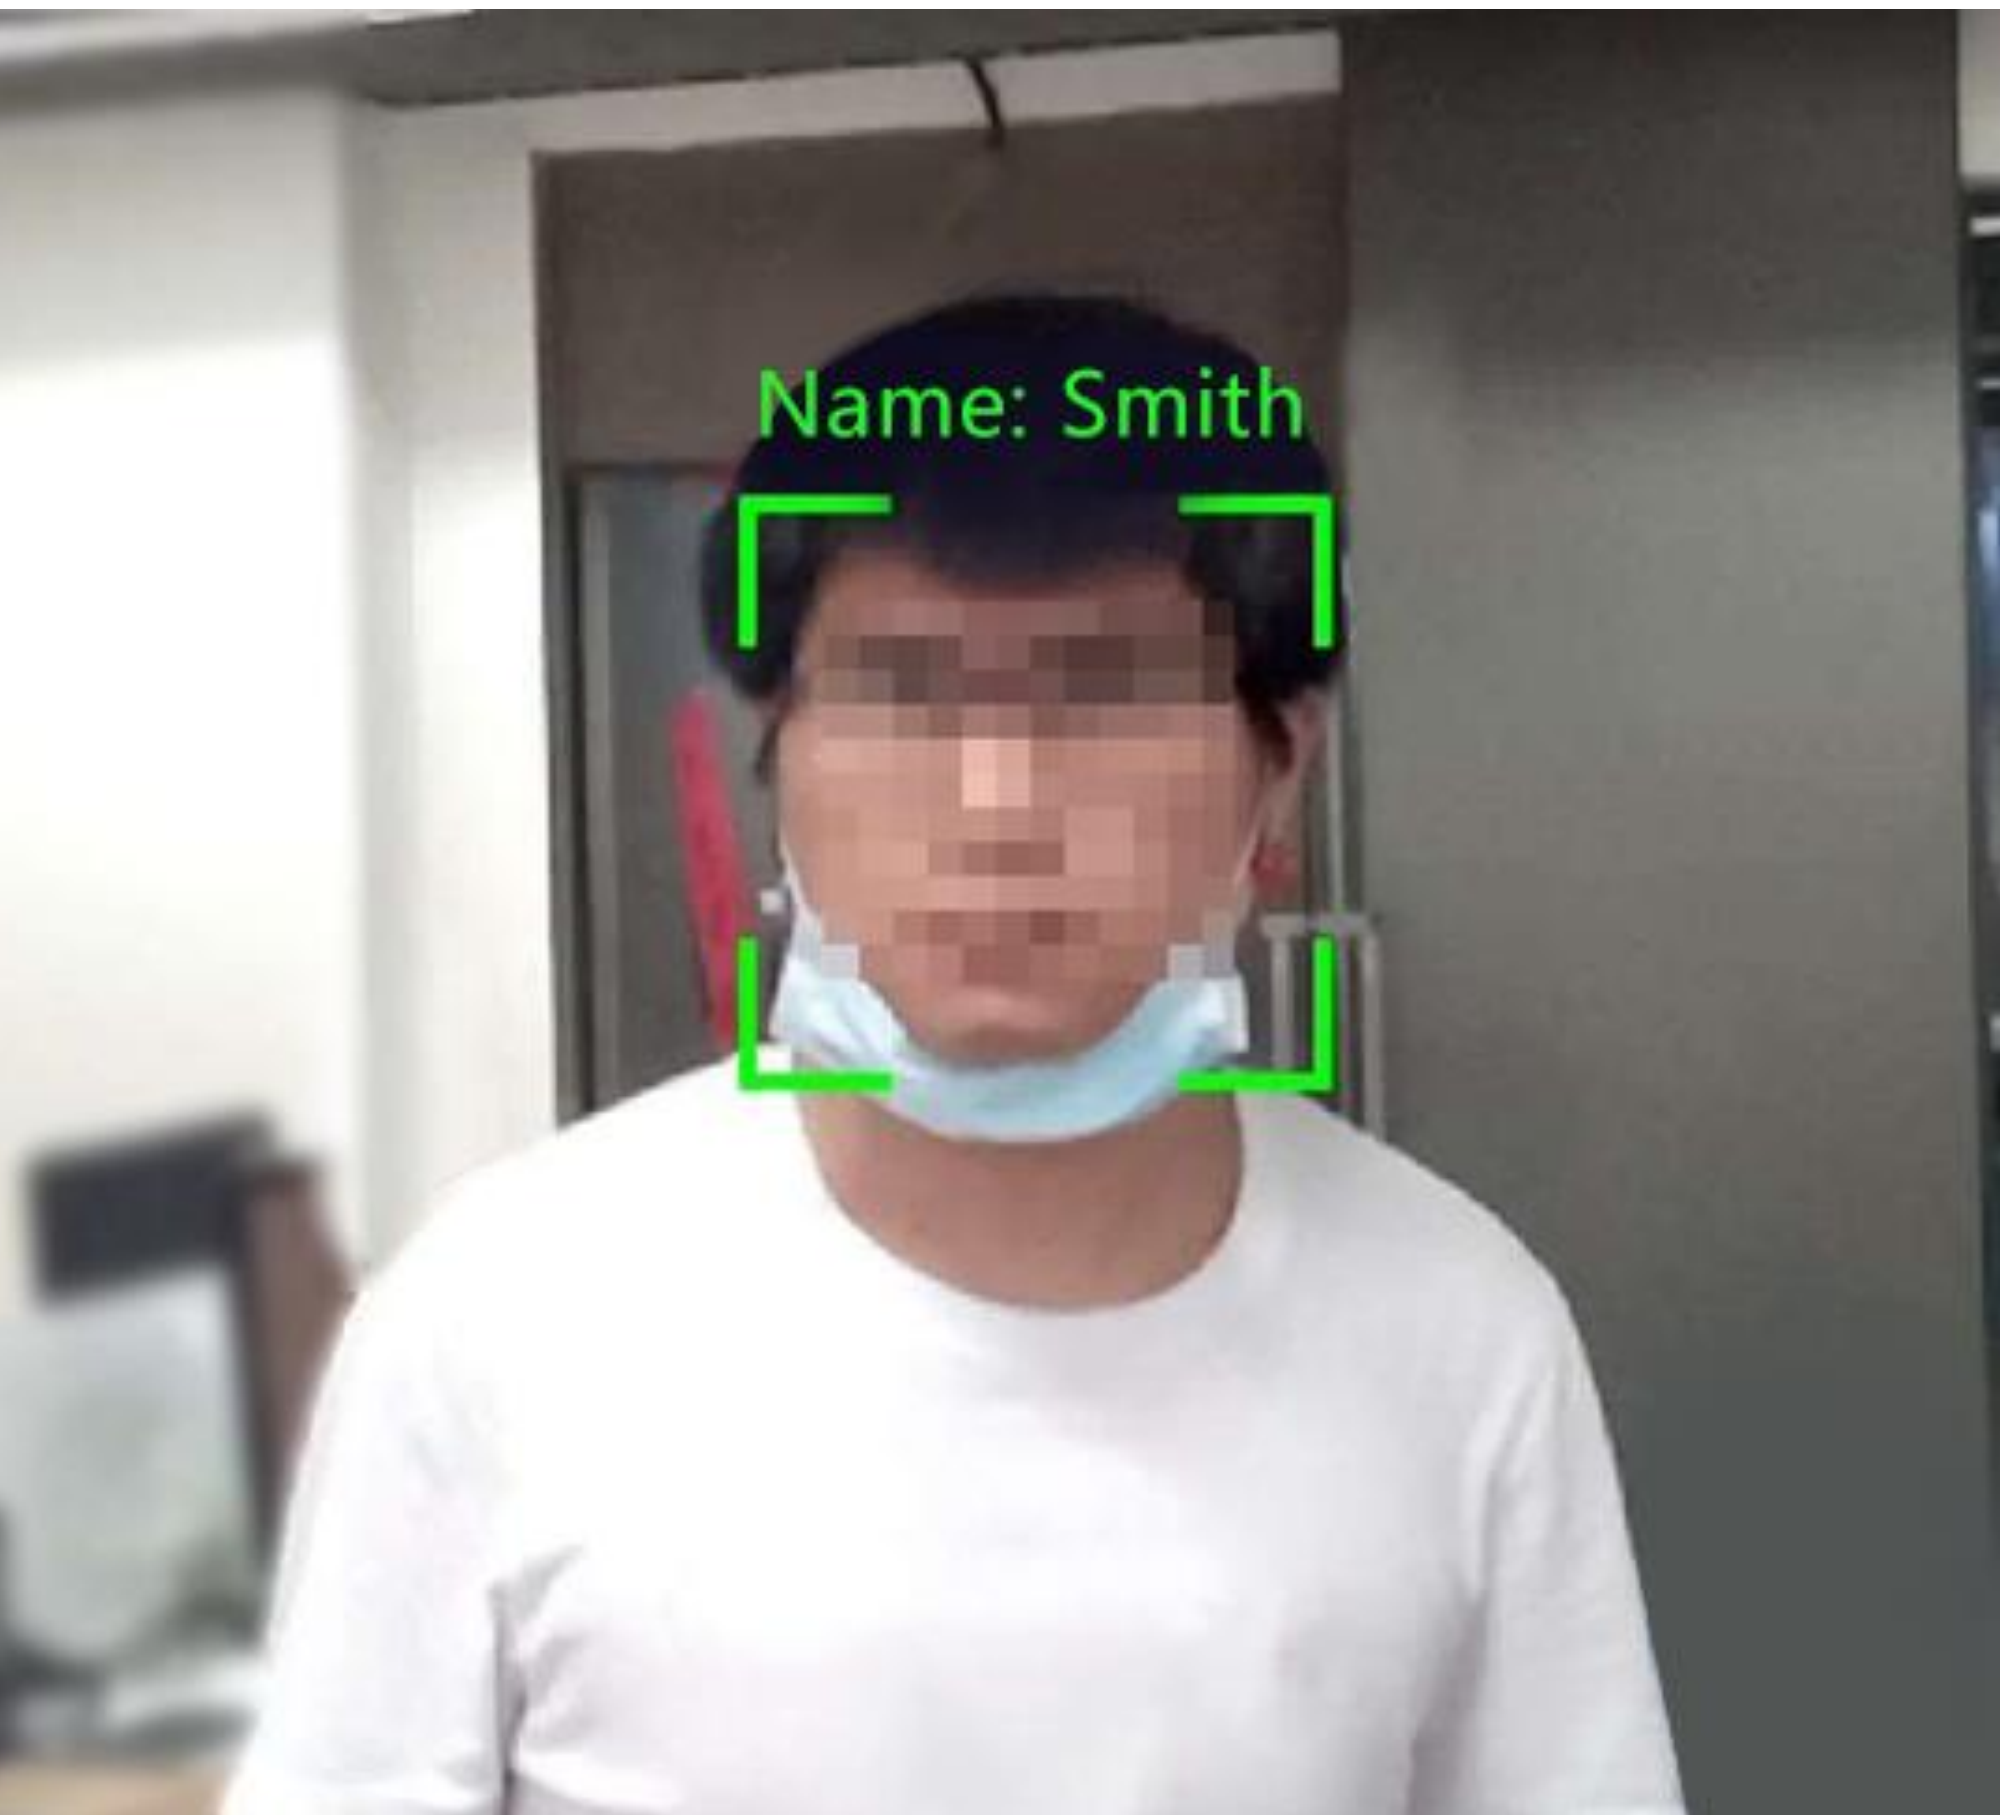
Night-vision /Facility inspection mode

Thermal imaging scanning of industrial facilities or establishments of night places, HVAC equipment, pipelines and electronic equipment, to assist finding target with abnormal temperature or searching for unauthorized personal.



Face recognition mode

The face of target in the screen is recognized and the personal information will be displayed on the AR display. This mode is applicable for enterprises and institutions to manage their black and white lists of employees and visitors.



Application Scenario

Hospital

Early detection of the fever patients with the quick unaware and contactless temperature measurement and paperless registration to avoid the viral cross-transmission between medical personnel and potential fever patients.

Office Buildings

Quick unaware and contactless temperature measurement and paperless registration to distinguish potential patients from others employees in a very short of time.

Checkpoints

With the build-in unaware and contactless thermometer, police checkpoints for screening patients can be speed up dramatically.

Central Business District

Quick unaware and contactless temperature measurement and paperless registration to distinguish potential patients from others customers in a very short of time.

Product Features

Helmet Body

Advance stab-proof metamaterial materials with energy-absorbing design and ultimate weight reduction

115g (0.25 lb)
helmet shell weight

3kg (6.6lb)
steel cone

1m (39.3inch)
free falling

1080g **(2.38** lb)
total weight

Impact without damage

Helmet Goggles

Same manufacturing process as helmet goggles for pilots

Advanced photochromic material with multiple protection

All-time capability with lighting conditions self-adaption

Air-borne Droplets

High-Speed Impact

Scratch

Fingerprint

Water Mist

prevent high-speed impact of 6mm (0.236 inch) steel ball at 200 m/s(656.2 ft/s) without rupture or penetration

200m/s

AR Display

High standard array optical waveguide AR technology, 24/7 new visual experience

as watching **74-inch** TV from 118.1 inch (3m) away

Field of view: 35°

No Dark Corner, Blind Spot or Sense of Oppression

Resolution: 1280 × 720

Rated Brightness: 300 nits

Communication

Advance metamaterial technology with strong signal, low power consumption and ultra-low radiation

conformal antenna **8-in-1**

Specific Absorption Rate

SAR < **0.05** W/kg(**0.023** W/lb)

only **1/20** of mobile phone radiation

Design of Gravity Center Balancing

Refer to the balance **design of aircraft** gravity center

Avoid the formation of cantilever structure in working state, so as to **protect the neck** to the greatest extent and **improve wearing comfort**

the range of the gravity center

c.g.diagram < **5** mm (**0.197** inch)

Infrared Thermal Imaging

High-accuracy quick unaware and contactless temperature measurement

Efficiency

200 people/min

Range

-20℃ (**-4**℉) to **120**℃ (**248**℉)

Accuracy

±**120** ℉

Resolution

384×288

AI Capabilities

Support **offline face recognition and license plate recognition**

Support **QR code identification** for paperless registration

Battery Capacity

no less than

5000 mAh

Standby time

24 h

8 h

Temperature measurement mode [2]

[2]In most cases, we can turn off the AR screen with one key to reduce power consumption when there is no target for temperature measurement, and the measured endurance can reach 8 hours. In the continuous temperature measurement mode, the endurance is about 5 hours.

Ergonomics

Modified Lycra fabric

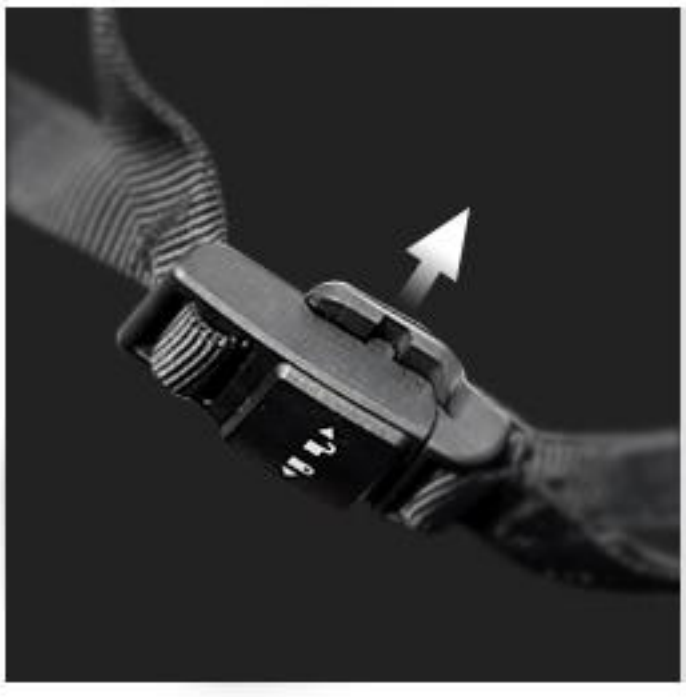
High ability to mold to the head

Super stretch and shape retention for extra flexibility

All-day comfort and lasting fit

Military nylon laces with high strength

High-grade soft and durable **lamb suede**



Safety magnetic suction buckle can be opened quickly and effortlessly with just **one hand**

Basic Parameters

Basic information	
Processor	ARM Cortex A53 octa-core 2.5GHz
Operating system	Android 8.1
RAM	DDR 4GB
Memory	eMMC 64GB
Weight	1080±10g (2.38±0.022lb)

AR display module	
Display	Array type optical waveguide display
Resolution	1280x720
Field of view	35°
Virtual screen size	Equivalent to watching 74-inch TV from 3m away
Rated brightness	300 nits

Infrared thermal imaging module	
Resolution	384x288
Response band	8μm~14μm
Image frequency-frame	25Hz
Temperature measurement range	-20℃~120℃ (-4°F~248°F)
Temperature measurement accuracy	+0.3℃ within the specified range(2m by default)

Visible light camera module

Maximum pixels	13 megapixels
Maximum aperture	F2.0
Field of view	78°
Video resolution	1080P@30fps

Data communication module

Wi-Fi	IEEE 802.11 b/g/n , 2.4GHz
Bluetooth	BT 4.2, backward compatible with 3.0, 2.1, supporting BLE

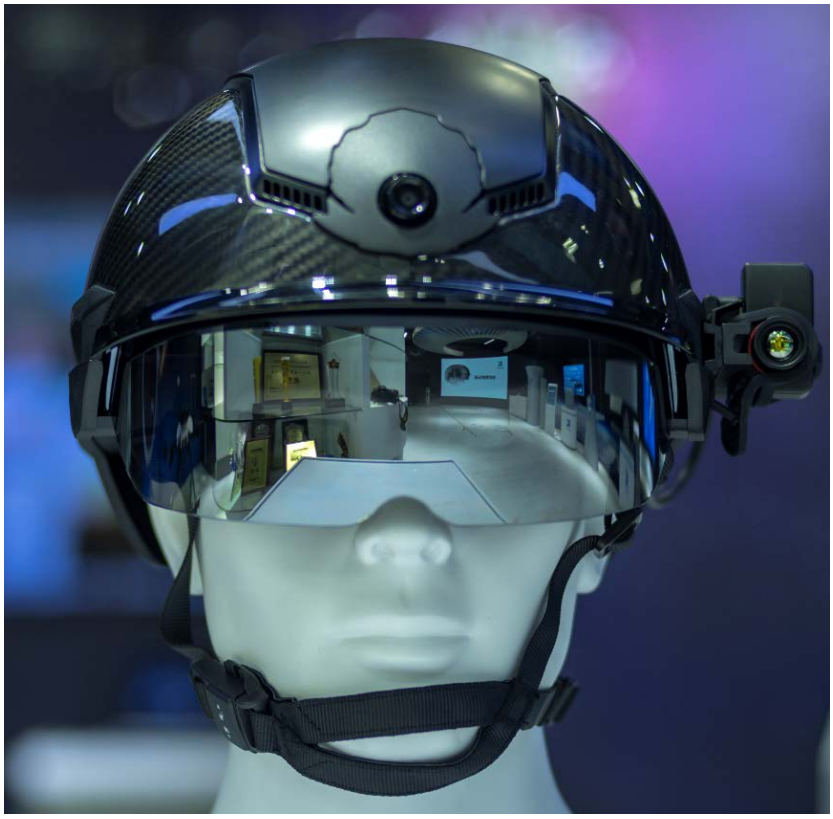
Battery module

Capacity	≥5000mAh
Voltage	DC3.7~4.2V
Charging voltage	DC5.0V ±5%
Quick charge	Supporting 2A fast charging

Protective performance

Absorbing collision energy	RF electromagnetic field radiated susceptibility
Penetration resistance	Complying with the requirements of penetration resistance test in GA 296-2001
Specific Absorption Rate	SAR < 0.05 W/kg (0.023 W/lb)
ESD anti-interference	Complying with the requirements of ESD anti-interference in GB/T 17626.2-2006
RF electromagnetic field radiated susceptibility	Complying with the requirements of ESD anti-interference in GB/T 17626.2-2006

Smart Helmet With Watch Quotation And Packing Information



1.Price Term： FCA SHENZHEN

2.Packing Info:

1PCS/CTN: 365×470×290mm,4.75KG;

2PCS/CTN: 565×470×370mm,8.68KG;

4PCS/CTN: 725×565×470mm, 18.45KG.

Thermal & Optical Bi-spectrum Network Bullet Camera

High sensitivity thermal module with 256 x 192 resolution

NETD is less than 60 mk (@25° C, F#=1.0)

Supports contrast adjustment

Leading thermal image processing technology: Adaptive AGC, DDE, 3D DNR

Up to 15 palettes of adjustable color

Reliable temperature-anomaly alarm

Temperature Range From -15°C to +150°C

High quality optical module with 2 MPresolution

Bi-spectrum image fusion, picture-in-picture preview

Specifications:

Thermal	
Image Sensor	VOx Uncooled Focal Plane Arrays
Resolution	256×192
Pixel Interval	12μm
NETD	Less than 60 mK (@25°C,F#=1.1)
Aperture	F1.0
Field of View	35° × 27° (H × V)
Optical	
Image Sensor	1/2.8" 2.0M Pixel CMOS
Resolution	1920×1080P
Min. Illumination	Color: 0.005Lux @ (F1.2, AGC ON), B/W: 0.001 Lux @ (F1.2, AGC ON)
Field of View	84° × 45° (H × V)
Focal Length	4mm
Shutter Speed	1s to 1/100,000s
White Balance	Auto/Manual/ATW (Auto-tracking White Balance)/Indoor/Outdoor/Daylight Lamp/Sodium Lamp
Day & Night	ModeIR cut filter with auto switch
WDR	80 dB
Feature	
Bi-spectrum Image Fusion	Fusion view of thermal view and overlaid details of the optical channel
Picture in Picture	Combines details of thermal and optical image PIP, overlay thermal image on optical image
Smart Function	
Face snapping	Built-in deep learning AI algorithm, Supports simultaneous detection of 20-30 faces
Temperature Measurement	Support global and local temperature
Temperature Range	From -15°C to +150°C
Temperature Accuracy	Target temperature 35°C ^ 38°C ±0.3 °C Target temperature 20°C ^ 33°C ±0.6 °C Target temperature 38°C ^ 50°C ±0.6 °C
Network	
Main Stream	Thermal: 25fps(1920 × 1080, 1280 × 720)
Sub Stream	Thermal: 25fps(704 × 576, 352 × 288)
Video Compression	H.264 (Baseline/Main/High Profile) /MJPEG/H.265
Audio Compression	G .711u/G.711a/G.722.1/MP2L2/G.726/PCM
Protocols	TCP/IP, ONVIF, GB/T 28181, DHCP, RTP, RTSP, PPPoE, UPnP, UDP
API	ONVIF (Profile S, Profile G, Profile T), SDK
General	

Web Client Language	languages English, Chinese
Power	DC 12V, 0.65A
Work Temperature/Humidity	From -20°C to 55°C; Humidity: 95% or Less
Protection Level	IP67
Dimension	246 mm × 101 mm × 81 mm (with bracket)
Weight	Approx. 1.0 kg

Attentions:

1. It is not recommended to be used outdoors. Outdoor sunshine, wind and temperature difference will affect the temperature measurement accuracy. If you need to use outdoors, you can build a wind proof and heat preservation tent

2. The temperature measuring equipment shall be used in the room with the room temperature between 10 ℃ - 40 ℃. Do not install the temperature measuring equipment under the vent to ensure that there is no heat source within 3 meters

3. Entering the room from the cold outdoor environment will affect the accuracy of temperature measurement, so it is necessary to conduct the forehead temperature test after the forehead is unobstructed for three minutes in the room and the temperature is stable

4. The temperature read by the temperature measuring equipment is the temperature of the forehead temperature area. When there is water, sweat, oil or heavy makeup on the forehead or there are many wrinkles in the elderly, the temperature read will be lower than the actual temperature, so as to ensure that there is no hair or clothing in this area

FINGERTIP PULSE OXIMETER CATALOGUE

Product Specifications:

Fingertip pulse oximeter

Specifications:Physical characteristicsMachine

Dimension:58mm*32mm*35mm

Weight:32g(Without battery)

Outer box:75mm*65mm*46mm

Classification

Anti-electronic shock type: internally powered equipment

Anti-electronic shock degree: type BF equipment

EMC: type B class I

Mode of operation: continuous operation enclosure degree of ingress

Protection: IPX4

Power

Internal	2 AAA 1.5V alkaline batteries
Power consumption	Smaller than 30mA(normal)

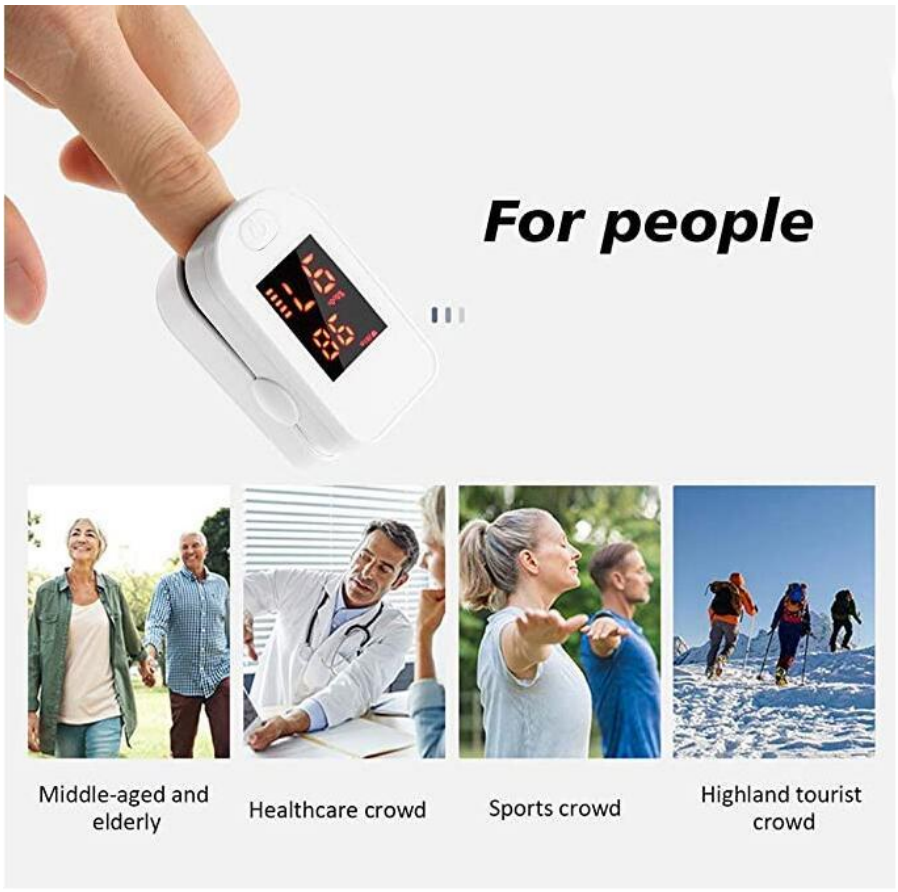
Power consumption

Operating temperature	5°C~40°C
Storage temperature	-10°C~50°C
Relative humidity	15%~80% non-condensing

Alarm default value

Hemoglobin saturation display		35%~100%
Pulse rate display		30-250 BPM
Pulse rate	Hemoglobin saturation	1%
	Pulse rate	1BPM
Measure accuracy	Hemoglobin saturation	2%(70%-100%)unspecified(≤70%)
	Pulse rate	2BPM

Basic Functions:



For people
Middle-aged and elderly
Healthcare crowd
Sports crowd
Highland tourist crowd

Disinfectant fog machine

This kind of t-imer atomizing sterilizer/fog s-moke machine is g-ood to provide you c-lean environment. Simple operation makes it user-friendly. What are you waiting for? Just come and buy.

Features:

Outputs 200CFM (Cubic Feet per minute) at 6 meters (19.7 feet), covering a large area in few minutes.
Up to 100ml high c-apacity water t-ank, long-lasting.
It can effectively eliminate most of the bacteria, give you a c-lean environment.
T-imer function provides you safe & endurable use.
Convenient for you to carry to various scenes, like, car, office, bedroom, hotel, dormitory, etc.
In the process of use, it will not emit strange taste, making your use more comfortable.

Specifications:

Input voltage: AC110-240 V 50/60Hz
Total p-ower: 900 W
Fog output: 200CFM/min
Water t-ank: 100ml
Material: Plastic
Plug type: 3 (Optional)
Cable length: 1 meter
Item color: White
Item size: 300 * 300 * 200mm / 11.8 * 11.8 * 7.9 inches (Length * Width * Height)
Weight: 2500g / 88.2 ounces
Package size: 385 * 385 * 235mm / 15.2 * 15.2 * 9.3inches (Length * Width * Height)
Package weight: 3000g / 105.8 ounces

Notes:

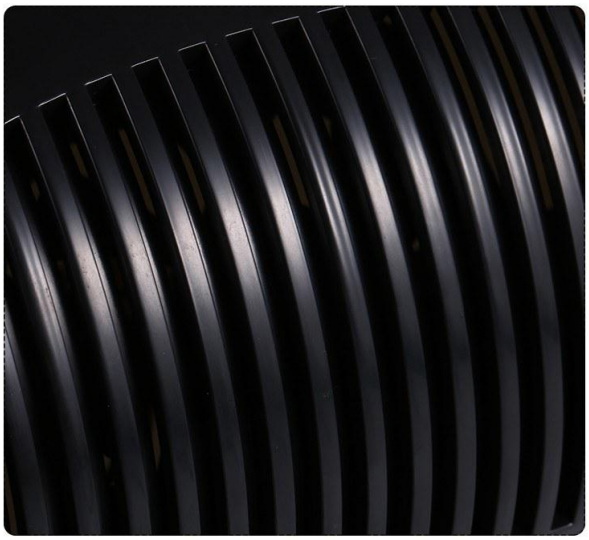
1. This item is non-waterproof, please use it carefully and do not exceed the rated p-ower.
2. Before connecting this unit to the main p-ower supply for the first t-ime you m-ust fill the fluid jar with professional fog fluid or thimerosal and check that the nozzle is c-lean and unobstructed.
3. It takes 5minutes for warming up.
4. The machine m-ust be placed horizontally.
5. Do not t-ouch the nozzle and machine while it is working and keep it far away from fire.
6. There are different plug specifications to choose from. Please choose o-ne suitable for your country.
7. It will stop working for warming up again while used and continue to work again and it will make a sound for informing you till the timing end.

Packing List:

1 * Sterilizer
1 * Instruction

Larger spray nozzle design, 200CFM/min fog output

100ml water tank design



heat dissipation design for better operation

Nice sterilizer for good environment

Preheat Pilot Lamp, it can work when the indicator lamp flash after pressing the switch

Switch

Timer

Optional Types

EU Plug

US Plug

UK Plug

Nano spray gun

This kind of Blue ray nano spray gun is g-ood to provide you c-lean environment. Simple operation makes it user-friendly. What are you waiting for? Just come and buy.

Features:

1.High-quality nano spray port, using PA high temperature resistant material, fast fogging, large amount of fog

2.Porous heat dissipation, the device releases a large amount of nano-spray while the fuselage intelligent heat dissipation.

3.Adjust the amount of fog according to the softness

4.Large-capacity water bottle, which can adjust the control time according to the amount of fog.

Convenient for you to carry to various scenes, like, car, office, bedroom, hotel, dormitory, etc.

In the process of use, it will not emit strange taste, making your use more comfortable.

Specifications:

Rated voltage: 220-240 V 50Hz

Rated power: 1200 W

Steam gas Production: 22ml/min

Water t-ank: 260/500ml

Material: PA high temperature resistant material

Plug type: 3 (Optional)

Power cord length: 2.5 meter

Item color: White

Item size: 22 * 12 * 22cm / 8.6 * 4.7 * 8.6 inches (Length * Width * Height)

Weight: 1300g / 45.9 ounces

Package size: 24 * 14 * 24mm / 9.4 * 5.5 * 9.4 inches (Length * Width * Height)

Package weight: 1800g / 63.5 ounces

Notes:

1. This item is non-waterproof, please use it carefully and do not exceed the rated p-ower.

2. Before connecting this unit to the main p-ower supply for the first t-ime you m-ust fill the fluid jar with professional fog fluid or thimerosal and check that the nozzle is c-lean and unobstructed.

3. Do not t-ouch the nozzle while it is working and keep it far away from fire.

4. There are different plug specifications to choose from. Please choose o-ne suitable for your country.

5.Liquid and disinfectant ,ingredient can not with alcohol,will cause burn!!!

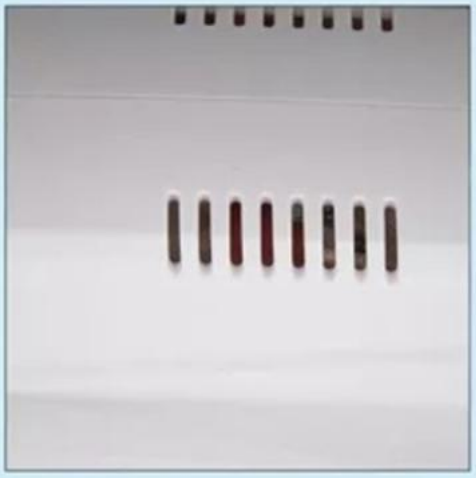
Packing List:

1 * Nano spray gun

1 * Instruction

NEGATIVE ION BLUE PASS NANO SPRAY GUN

MICRO-NANO BLUE SPRAY PORT, USING PA HIGH TEMPERATURE RESISTANT MATERIAL, FAST FOG, LARGE FOG VOLUME, SPRAY DISTANCE UP TO ABOUT 1.5M



MORE VENTS

DOUBLE-SIDED COOLING VENT DOUBLE-SIDED HEAT DISSIPATION VENTS, WHILE RELEASING A LARGE AMOUNT OF NANO BLUE LIGHT SPRAY,THE FUSELAGE INTELLIGENT HEAT DISSIPATION

WATER TANK

USE WATER FOR ABOUT 15-20 MINUTES AT A TIME

SPRAY REGULATOR

THE AMOUNT OF FOG IS ADJUSTABLE

Optional Types

EU Plug

US Plug

UK Plug

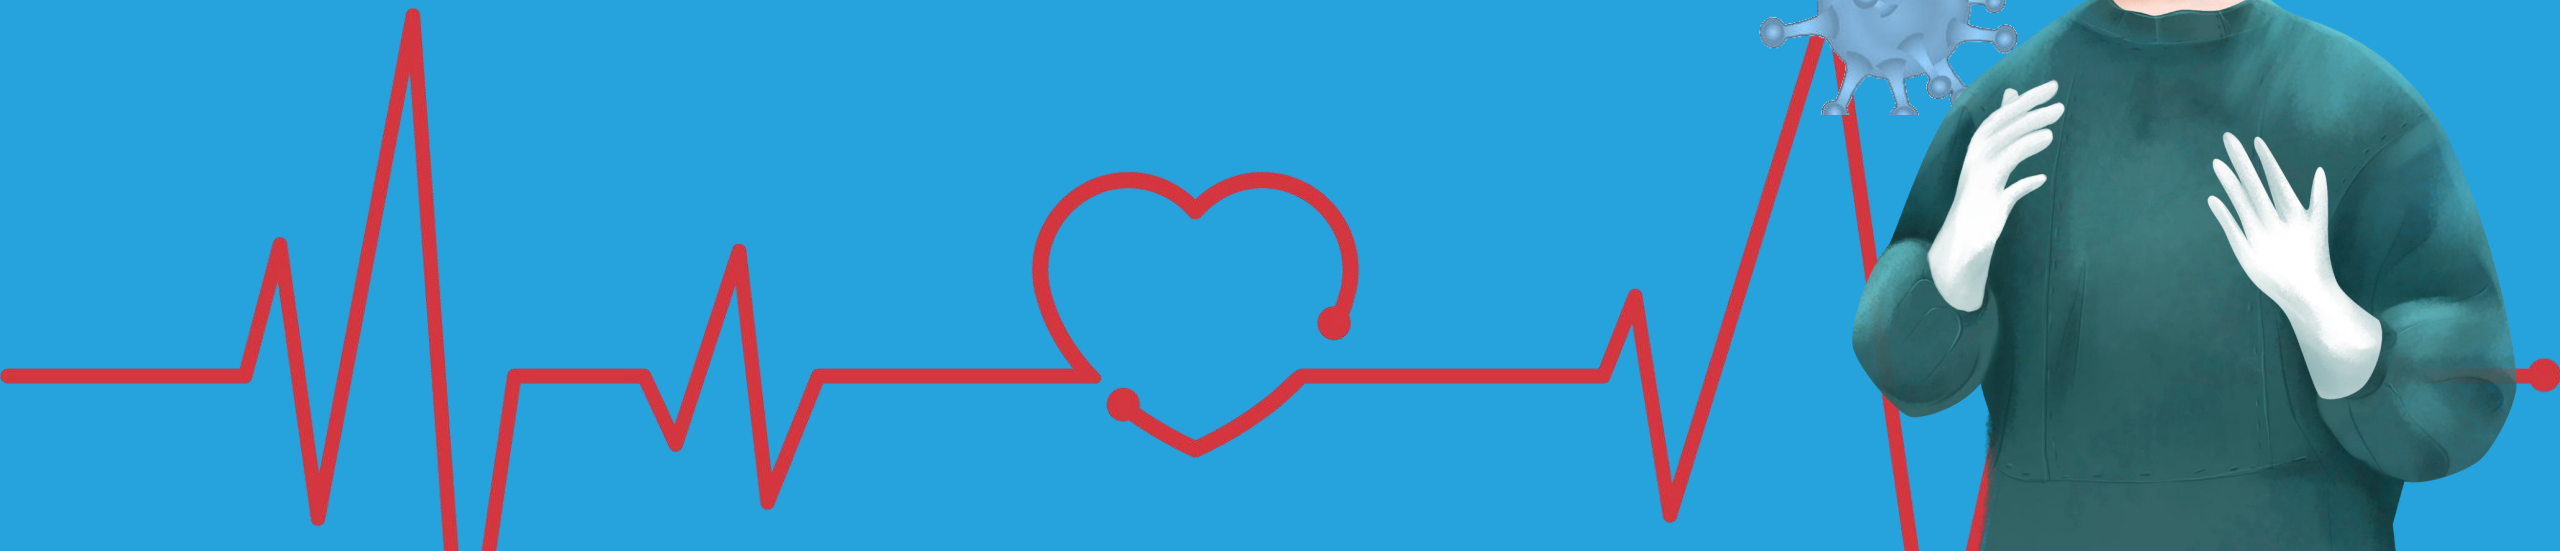
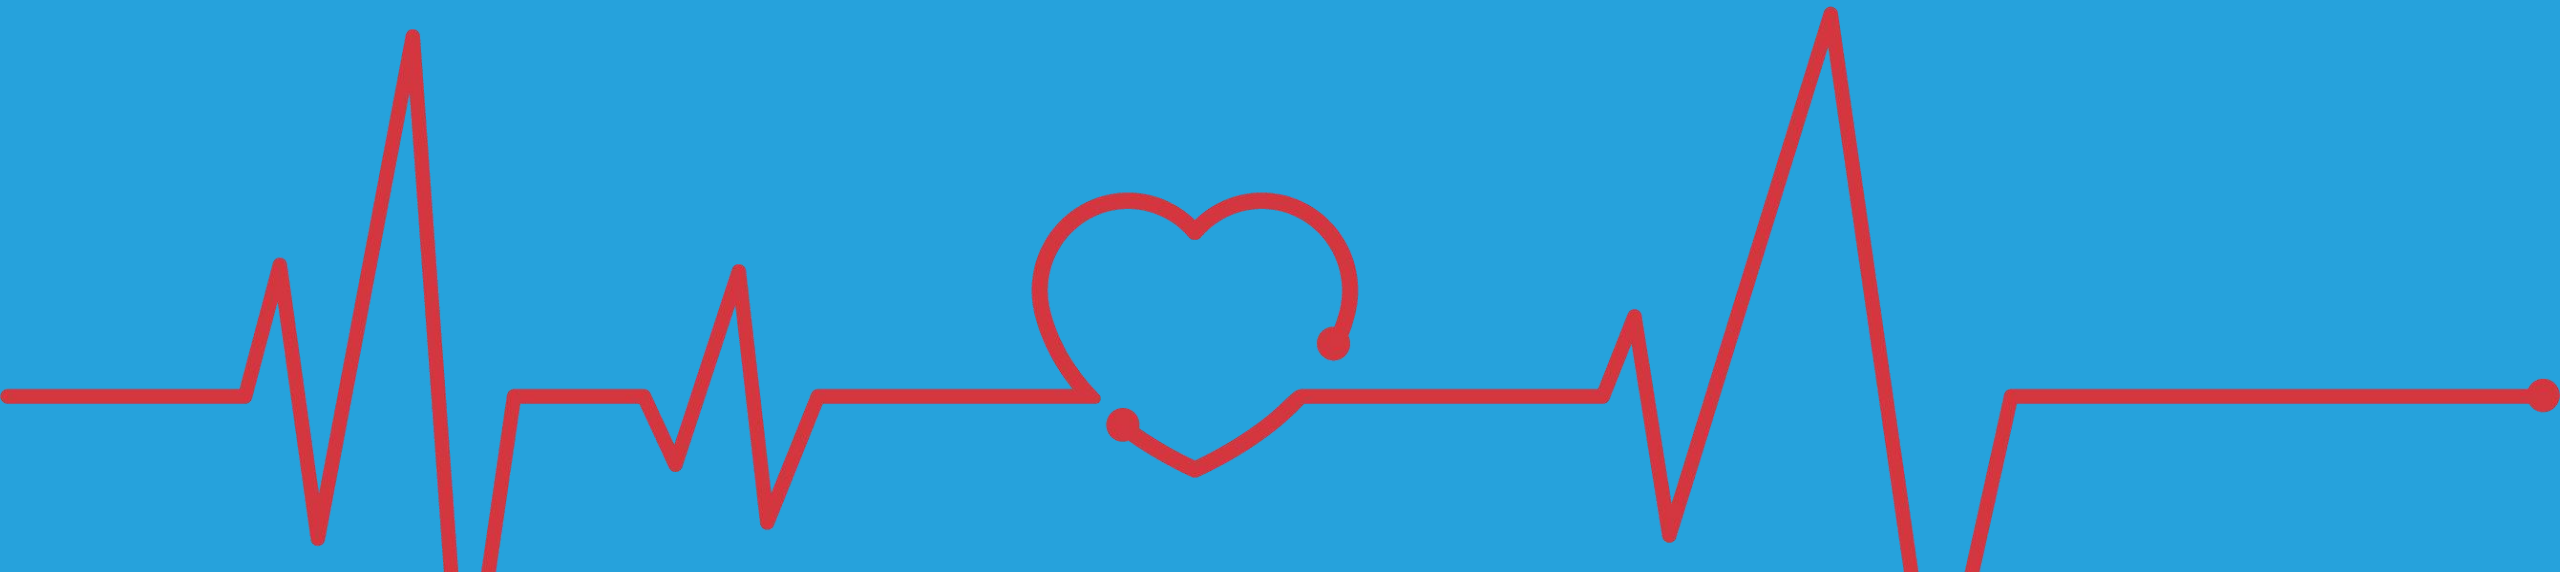
Intelligent Anti-Epidemic Ultimate Solution

Advanced science and technology triple protection to ensure the public safety of the space and escort you to resume work!



During the COVIND-19 Period in China. In order to ensure people's health, safe travel and resume work. We put the Disinfection Channel in the public place, when people enter a place need to through the disinfection channel to check the temperature, to disinfect for people.
Once the people temperature over the 37°3 it will alarm, once the Disinfection Channel alarmed we will take the person who temperature over the 37°3 to the Quarantine, the Quarantine can disinfet for the person also has bed, toliet, the person can stay in it to wait the Medical staff arrived.
Same time we will use the Air purification system to clearn the atmosphere and disinfection.



Scene Map of Epidemic Protection

Disinfection Channel
Temperature measurement + disinfection

Normal Body Temperature , pass

Abnormal Body Temperature

！！Enter the negative pressure isolation warehouse for isolation and wait for professional medical personnel to deal with it

Continuous disinfection of public places by high-power disinfection machine

Data Transmission

Data transmission

Data Transmission

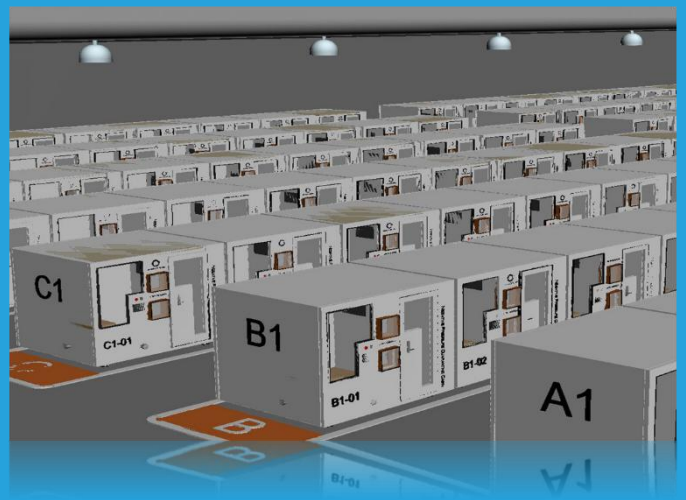
Background data center & Government agencies

①

Go to the Disinfection Channel - Testing temperature+ disinfection+wash hand

②

Once checkd the person who body temperature exceeds normal, take him to the Emergency Negative Pressure Isolation Cabin.

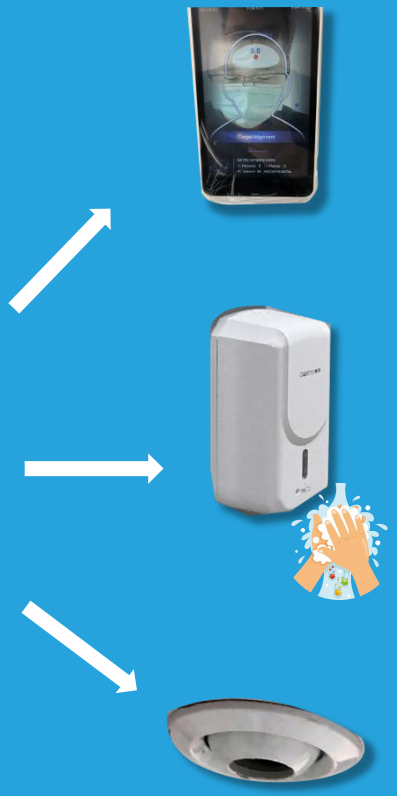


③

The Air Disinfection and Purification System clearn and disinfet for the public

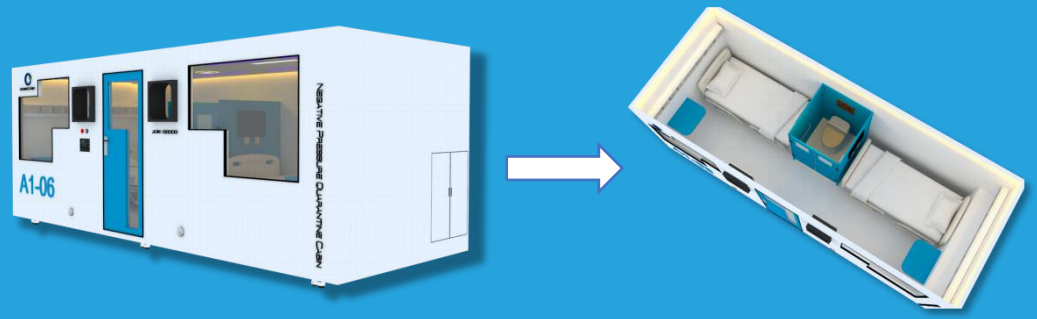
This three machine can be used alone or use two machine or three machine together !

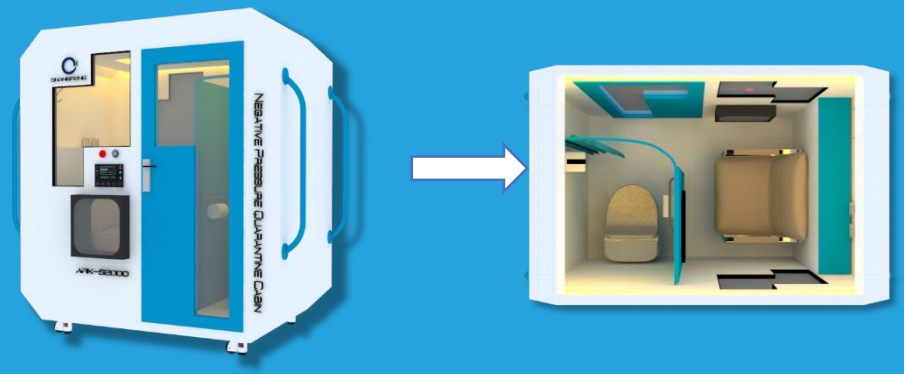
01Detection Systems-Disinfection Channel



- Temperature Measurement Sterilization Station
- Two models: H01-01(Disinfection+Wash hand+ Temperature Measurement) / H02-02(Disinfection)
- Accurate infrared thermal imaging thermometer
- Complete disinfection: Hand disinfection/Sole disinfection/Parts below waist
- Quick alarming device
- Face recognition: Person’s identity can be bound by face recognition
- Fog method: Ultrasonic atomization
- Customization

02 Isolation System- Emergency Negative Pressure Isolation Cabin





Three models: ARK-S2000 (Negative cabin with a single room),ARK-S2000 (Negative cabin with a double room).

Virus killing rate 99.9%, sterilization rate 99.9%

Negative pressure exhausting system

High-voltage electrostatic field capture

Ultraviolet disinfection

Activated carbon filter purification technology

Camera compatible with 4g network

Infrared body temperature detection device

LCD screen

Safety delivery windows

UPS uninterruptible power supply

One-button emergency alarm

03Purification System-Air Disinfection and Purification System

- Air Disinfection and Purification System
- Three models: FAST-Y-90A-L(Purification rate: 5000~6000m³per hour),FAST-Y-90A-M (Purification rate: 9000~10000m³ per hour),FAST-Y-90A-H(Purification rate: 10000~20000m³ per hour).
- Triple antivirus purification methods: High-voltage electrostatic field + Ultra-high dose UV disinfection + Activated carbon filtration.
- High disinfection and purification rate: 6000-20000m³ per hour.
- Effective disinfection and purification: The virus killing rate 99.9%, and the sterilization rate 99.9%.
- Touch screen display
- Intelligent management
- Remote control
- Statistical data analysis processed by the included platform(system)
- Lockable universal wheels
- Customization

Fast disinfection and killing in 10 seconds

Smart movalble
Temperature detection and disinfection channel

Atomizatio/ temperature measurement disinfection

This product is specially designed for body temperature detection and body disinfection of people in public areas

MODEL: H01-02A atomization disinfection / temperature measurement disinfection
TYPE： atomization disinfection
VOL：AC220V
POWER：400W
Use noise: below 36dB
OUT SIZE：2100x1100x2450mm
INNER SIZE：2100x1000x1950mm
WEIGHT：220kg

Food grade disinfectant-safty
Remote temperature control alarm-safety
Move anytime, anywhere-convenient

Detection time: instant
Detection distance: 10-30cm
Temper。meas.area: forehead,
inner side of wrist
Detection method: infrared
accuracy: ±0.5 degrees Celsius
size：600x1180x2200mm
weight：80kg

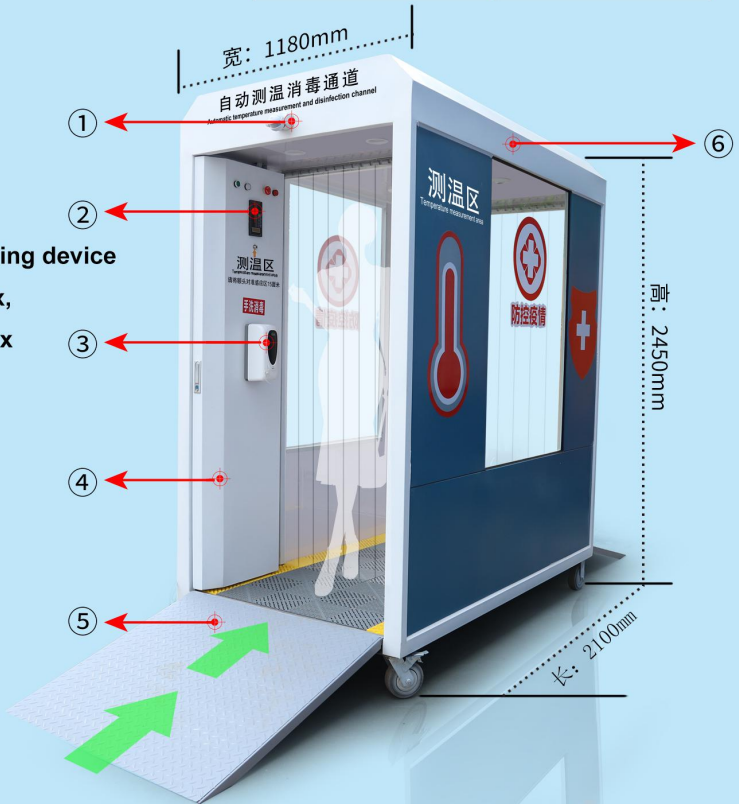
减少测温工作量和人员投入
提升测温的通行速度
降低检测人员被感染风险

高灵敏 快速测温
无盲点 发热报警
不漏报 一体安装

Technical Parameter

Model	H01-02ASpray disinfection H01-02Atemperature measurement and disinfection	**Spray channel length**	1460MM
Temperature measurement channel length	640MM	**Fog method**	Ultrasonic atomization
Human induction Method	Microwave detection	**Inner size**	2.1*1.0*1.95M
Spray control method	Microwave induction start delay stop (Adjustable from 15-60 seconds delay) 2 outlet fog	**temperature sensing method**	Infrared light wet (Accurate live seal detection)
Out size	2.1*1.1*2.45M	**Spray efficiency**	3-6kg / H
Spectral range	8-14um	**vol.**	AC22oV
Spray area protection	Anti-stick PYC curtain	**Temp. collection distance**	10-20cm
power	900W	**Spray disinfection waiting time**	Recommended 5-15 seconds (customized according to needs The equipment is not subject to mandatory control)
temperature location	head or Wrist (Contactless)	**Use noise**	less than 36dB
Disinfectant capacity	20L	**temp. collection accuracy**	±0.5degree Under the greenhouse
Use environment	0-35 degree	**Type of disinfectant**	100-400PFN Carbon dioxide diluted dissolved oil 200PPMHypoxic acid diluted solution
temperature detection output	qualified when green on + over temperature when red light + continuous alarm sound	**Rainproof function**	The equipment shell has rainproof function (Open peers are not rainproof)
Hand disinfection method	Independent area sensor spray type Disposable disinfectant	**temperature collection time**	2S
main material	Cold rolled steel plate	**Temp. display**	numbers
		temp. collect range	34-45degree

① Far infrared sensor
② Control Panel
③ Induction hand washing device
④ Electrical control box, disinfection liquid box
⑤ Pedal
⑥ Disinfection area



APPLICATION

Industrial Park

community

CBD

School

The Mall

Hotel

Feature

1.Face recognition and external personnel investigation and file storage

Can carry out identity authentication and file storage in areas with high population flow such as shopping malls, stations, communities, factories, etc.

2.Using high-precision infrared spectrum sensor, factory calibrated by blackbody radiation source, can measure body temperature without contact at a long distance, can effectively avoid cross infection.

Voice prompt for normal body temperature

Voice prompt for over temperature alarm

3.Smart display

The body temperature display can be adjustable accordingly to the seasonal temperature difference, which can display the human body temperature more accurately.

4.Hand wash smart spray disinfection

The temperature measurement area is equipped with an intelligent induction sprayer, non-contact induction spraying, safe and hygienic, and can effectively sterilize the hands.

5.Automatically sense the ultrasonic out of the fog, stop when people walk out

A microwave sensor is installed at the equipment port, which can detect the entry of people, start the fog machine by itself, spray the disinfectant into the channel, and stop automatically when the person leaves to avoid liquid waste.

6.Equilibrium spray box to reduce throttling without hurting facial organs

The balanced spray method is used in the disinfection channel, instead of directly spraying human facial organs, the mist is more refined and no waste is caused.

7.Bottom circulating waste liquid tank

There is a circulation tank inside the disinfection channel, which can collect and process the excess disinfection liquid to avoid pollution to the surrounding environment.

8.Equipment status reminder

The device has status reminder displays such as work, liquid shortage, light voice, etc., so that the equipment management staff can accurately grasp the equipment operation status. Real-time trends of various personnel

9.Automatic fluid replacement function

The device is equipped with a large-capacity liquid storage tank, with a liquid alarm prompt function to avoid damage to the atomization equipment due to lack of liquid, and automatically refills the atomization tank and stops automatically, which can meet the daily usage

10.External ramp pedal

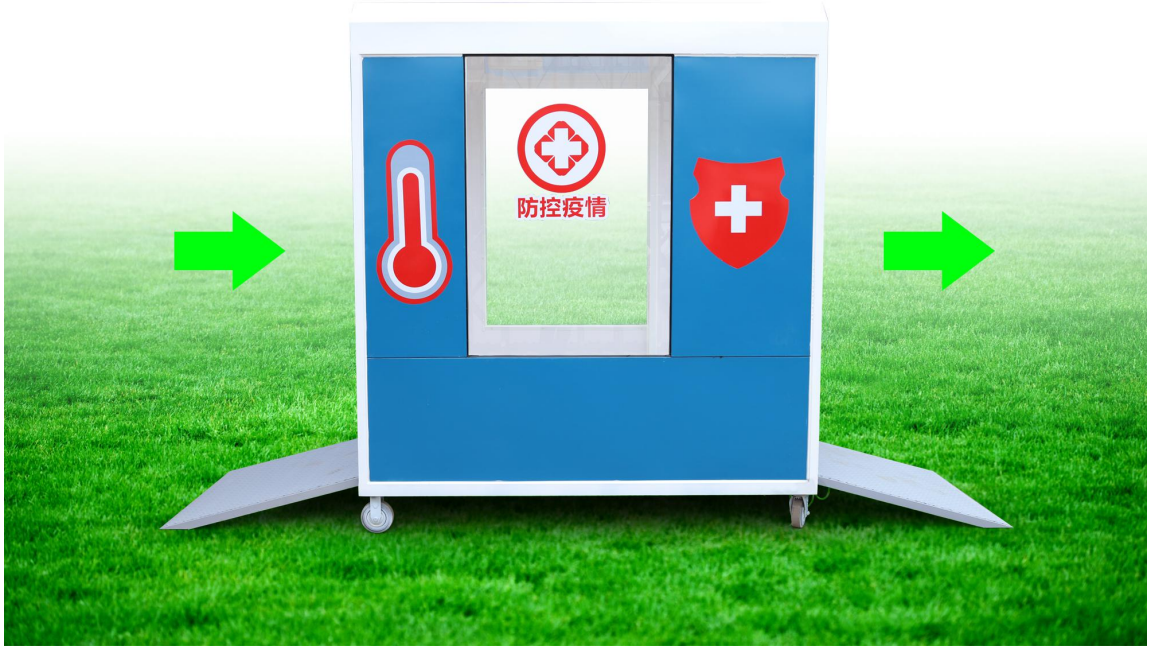
There are non-slip pedals at the entrance and exit of the equipment, which is convenient for the elderly and children

11.Lighting auxiliary functions

Fully considering the use of different scenes, the channel is equipped with LYD waterproof lights, which can be used at night or in dark places

12.Quick layout and transfer function

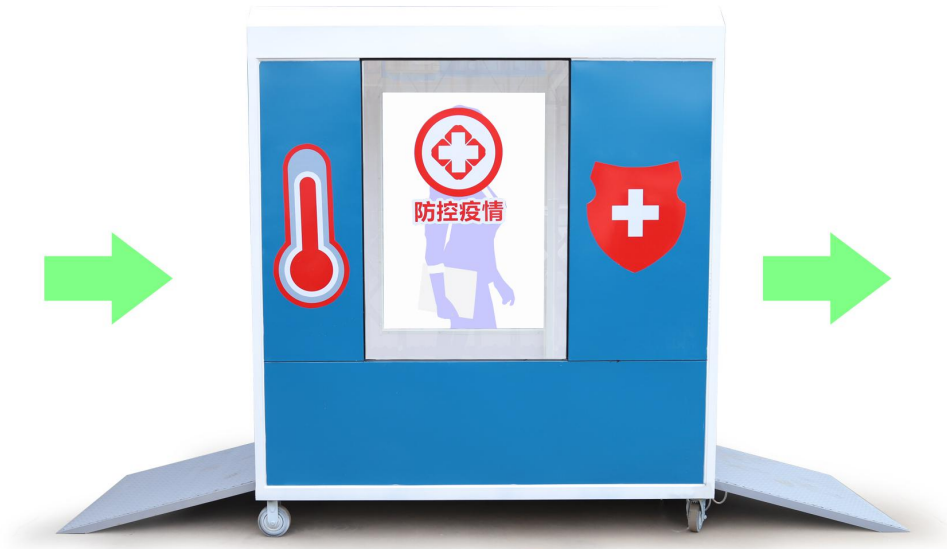
There are four wheels on the bottom of the device, and there are brakes, which can quickly reach the designated location for quick installation. The device uses 220V household AC power, and the function is less than 800 watts. The installation is simple and fast.



移动灵活
Move flexibility

安全消毒
Safe disinfection

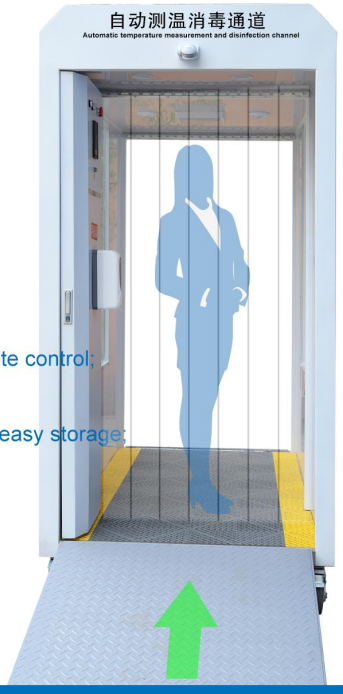
温度检测
Temperature check



Intelligent temperature inspection and disinfection, the equipment is integrated, intelligent, and removable. It is mainly used in public health emergencies. It can disinfect people or pets, goods and other living organisms in public places. , Harmless and pollution-free; non-contact body temperature detection of personnel can quickly, simply, safely, intuitively and accurately determine whether the detection personnel have abnormal body temperature. In case of abnormal conditions, that is, the personnel temperature is higher than the set temperature, the channel will give a voice alarm and intercept the personnel.

The equipment uses food-grade disinfectant to ensure the safety of personal application; low operating cost, high disinfection and sterilization, low risk, automatic detection of objects in and out of the channel, real-time display of operating status, equipped with casters and handles, which facilitates rapid mobile deployment during emergency; Beautiful shape, scientific design, and environmental protection, with a service life of 12 years.

Stable control of disinfection level to ensure disinfection effect;
Food grade disinfectant to ensure human safety;
Infrared human body temperature measurement, voice alarm;
Automatic induction antivirus;
Automatic reminder function for cleaning and maintenance;
Disinfect the soles;
LCD Chinese display, far infrared remote control;
Adjustable three-speed air volume, equipped with magnetic remote control;
Channel lighting (easy to use at night);
The upper and lower slopes can be folded and disassembled for easy storage;
Universal wheel with brake function, easy to move.



Widely used in: hospitals, schools, communities, supermarkets, shopping malls, scenic spots, stations, airports,Factory, construction site, exhibition, KTV and other places.
